PhD Research Position

A PhD position is immediately available for highly motivated students with strong background in molecular biology and genetics. The position is financially supported by the European Research Council for a period of 4 years.

Research project: The project aims at understanding the communication between cellular signalling networks and mitochondrial function in the regulation of aging, using the nematode *C. elegans*.

The laboratory is housed in the Andalusian Centre for Developmental Biology (<http://www.cabd.es/en-home.html>), within the University Pablo de Olavide in Seville, offering an excellent scientific environment.

Applicants should send their CV and a motivation letter to Marta Artal-Sanz (martsan@upo.es).

Recommendation letters or contact details for references are not mandatory but will be an advantage.

Deadline for applications: May 15th, 2012
