

Networks in the Life Sciences

Genomics, Proteomics and Systems Biology

Registration before
6th September, 2012

Confirmed speakers:

Matthieu Piel

Institut Curie, Paris
Systems cell biology

Luis Serrano

CRG, Barcelona
Protein-DNA interaction networks

Ruedi Aebersold

ETH, Zürich
Analytical protein chemistry and proteomics

Dagmar Iber

ETH, Zürich
Cellular signaling networks

Andreas Schuppert

Bayer Technology Services GmbH
Modeling of complex systems
with functional networks

Nicholas Eriksson

23andMe
Personalised genomics

Ben Lehner

CRG, Barcelona
Genetic systems biology

Eugenia Piddini

Gurdon Institute, Cambridge
Cell interactions

Richard Durbin

Sanger Institute, Cambridge
Human genetic variation

Juri Rappilber

University of Edinburgh
Large scale protein-protein interactions

Amos Bairoch

University of Geneva
Developer of PROSITE, ENZYME,
ExPASy, founder of Swiss-Prot

Alex Hoffman

University of California, San Diego
Immune response signalling networks

**Students may present posters in our poster competition
Students also have the chance to give talks**
