VENUE

MC²-31 will be held in Dubrovnik on 10–14 June, 2019. Dubrovnik is situated on Adriatic Coast in the southern part of the Republic of Croatia and, in recognition of its beauty, has been designated by UNESCO as a world heritage site. The venue of the meeting will be the Inter-University Centre (IUC) located at don Frana Bulica 4 (in the vicinity of the western gate (*Vrata od Pila*) of the Old City).

CONFERENCE SCOPE AND SCIENTIFIC PROGRAM

Since 1986, the Math/Chem/Comp meetings have been bringing together researchers working on diverse subjects spanning mathematics, computer science, and chemistry. In continuation of this tradition, presentations concerning all aspects of current research on computer modeling, combinatorics, graph theory, and topology applied to any area of chemistry, physics, material and life sciences will be welcomed. The conference program will include invited plenary and special lectures workshops and posters. In particular, the MC²-31 meeting will revolve around the following topics:

1. Mathematical methods and computational algorithms in modeling of atoms, molecules, and chemical processes;
2. Mathematical chemistry and chemical graph theory;
3. Molecular modeling in practice (including molecular dynamics and aggregation);
4. Chemical experiments, industrial processes, and mathematical interpretation

SCIENTIFIC PROGRAM

The conference program will include invited lectures, contributed oral presentations, and posters.
