

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION OF THE STUDY PROGRAMME			
1.1. Name of the study programme	Integrated Undergraduate and Graduate University Study in Geography and History; course: Education		
1.2. Provider(s) of the study programme	Faculty of Science		
1.3. Type of study programme	Vocational study programme <input type="checkbox"/>	University study programme <input checked="" type="checkbox"/>	
1.4. Level of study programme	Undergraduate <input type="checkbox"/>	Graduate <input type="checkbox"/>	Integrated <input checked="" type="checkbox"/> Postgraduate specialist <input type="checkbox"/>
1.5. Manner of implementation of the study programme	Classical <input checked="" type="checkbox"/>	Mixed (Classical + online) <input type="checkbox"/>	Online in entirety <input type="checkbox"/>
1.6. Academic/vocational title earned at completion of study	The bearer of this qualification is authorised to use the legally protected academic title of Master of Education in Geography and History (mag. educ. geogr. et hist.).		

2. INTRODUCTION	
2.1. Reasons for starting the study programme	<p>On the basis of official approval granted in 2005, the Dept. of Geography of the Faculty of Science of the University of Zagreb (in cooperation with Department of History of the Faculty of Philosophy of the University of Zagreb) has been conducting a study programme Integrated Undergraduate and Graduate University Study in Geography and History since the 2005/2006 academic year.</p> <p>Starting an integrated teaching university study programme stems from the needs of the Croatian education system. Geography and History as compulsory subjects from the 5th to 8th grades in primary school, a compulsory subject in the secondary school programme from the 1st to the 4th grade, and a mandatory subject in vocational schools. Geography and History occupies an important place in the education of pupils. Moreover, Geography and History belong to the group of <i>national</i> subjects because their upbringing and educational objectives promote the basic values referred to in the National Curriculum Framework: the dignity of human beings, freedom, justice, patriotism, social equality, solidarity, the dialogue of tolerance, labour, honesty, peace and health, conservation of Nature and the human environment and other democratic values. Geography and History opens up new possibilities for the development of the Croatian national, cultural and spiritual identity within the complex processes of globalization. In this period of the more emphasised integration of Europe, Geography points simultaneously to the importance of multi-culturalism, tolerance and to the European dimensions of Croatian society. The special importance of Geography and History have in promoting the values to which the National Curriculum Framework pays particular attention, and those are knowledge, solidarity, accountability and identity. By the structure of the teaching programme, the objectives and outcomes of teaching and learning Geography and History contribute to the development of all eight basic competences (communication in the mother tongue, communication in foreign languages, mathematical competence in natural history and technology, digital competence, learning how to learn, social and civil competence, initiative and enterprise and, particularly, the development of cultural awareness and expression) and all inter-subject themes. With regard to the contemporary needs of the Croatian education system and social reality, as the foundation of teacher education are based two-subject teaching university study. This is the concept of the two-subject study programme adjusted trend of decreasing pupils population and increasingly more difficult the fulfilment of the teaching</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>standards. This will avoid past practice that in many smaller and regional schools in particular courses teach non-experts.</p> <p>The tradition of the representation of Geography in the school system reaches back to the very beginning of modern Croatian education. With the establishment of the Chair of Geography at the Faculty of Philosophy in Zagreb in 1883, the systematic training of Geography teachers began. The Dept. of Geography of the Faculty of Science, University of Zagreb, has been continuing that tradition right up until the present day.</p>
<p>2.2. Assessment of the study programme's usefulness relative to the demand in the labour market in the public and private sectors</p>	<p>According to the results of scientific research of human potential in the teaching of Geography in elementary and secondary schools in the Republic of Croatia, along with research into demographic development at the level of individual enrolment fields, the labour market in the public and the private sector have an annual need for some twenty to thirty Master of Education in Geography and History.</p>
<p>2.3. Compatibility of the study programme with the University mission and the strategy of the proposer, as well as with the strategy statement of the network of higher education institutions.</p>	<p>The proposed programme has been coordinated with the Development Strategy of the University of Zagreb (the ISKORAK 2001 initiative), the Research Strategy of the University of Zagreb 2008-2013, the Act on Higher Education of the University of Zagreb 2008-2013, the Bologna Declaration, the Strategic Development Plan of the Faculty of Science of 2008 and other documents connected with science and higher education. The proposed study programme has been coordinated with the Network of Higher Education Institutions and the study programme in the Republic of Croatia (the NVVO).</p>
<p>2.4. Comparability of the study programme with other accredited programmes in higher education institutions in the Republic of Croatia and EU countries (name two programmes at most, of which one is from an EU country, and compare it with the proposed programme (provide internet addresses of the programmes)</p>	<p>In structure and competences on completion of the proposed Study Programme, it is partly comparable with the following programmes:</p> <ul style="list-style-type: none"> - the Undergraduate University Study in Geography (course education) – two subjects, University of Zadar, Dept of Geography and the Graduate University Study in Geography (course education) – two subjects, University of Zadar, Dept of Geography, http://www.unizd.hr/Portals/6/DokumentiOdjela/Preddipl_dpd_14-15.pdf; http://www.unizd.hr/Portals/6/DokumentiOdjela/Diplomski_dpd_14-15.pdf -the First Level of the Two-subject Study Programme in Geography, University of Ljubljana, Faculty of Philosophy, Dept. of Geography and the Second Level of the Master of Pedagogy Two-subject Study Programme in Geography, University of Ljubljana, Faculty of Philosophy, Dept. of Geography, http://geo.ff.uni-lj.si/sites/default/files/ge1-dvo_2015-2016.pdf; http://geo.ff.uni-lj.si/sites/default/files/ge2_dvo-ped_2015-2016.pdf
<p>2.5. Openness of the study programme to student mobility (horizontal, vertical in the Republic of Croatia, and international)</p>	<p>The proposed programme enables the mobility of students during study with the recommendation and supervision of coordinators and application of the ECTS grading scale.</p> <p>It should be emphasised that even up until now the Faculty of Science has stimulated and facilitated the mobility of students. In 1992, the Faculty of Science achieved <i>de facto</i> equalisation of the graduate level in the former undergraduate study with the Master's level (MSc) in study programmes at various European and non-European countries. On the basis of its own experience (1988), the Faculty of Science accepted the role in 1999 of a pilot-project institution for the university project introducing ECTS grades, and introduced the ECTS grading scale in all its</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>departments. The Faculty of Science was among the first faculties to introduce the Supplemental Diploma (1998) and Appendix according to ERASMUS.</p> <p>In accordance with that, it has achieved mobility in its Geography programmes to date, primarily of non-Croatian students and lecturers. In the entire Faculty of Science, the Dept. of Geography leads the way in the mobility of its students going abroad and students coming from abroad. As part of the ERASMUS and CEEPUS projects, an average of some ten students come to the Department, while some fifteen students from the Department of Geography leave for other universities at the same time.</p> <p>We encourage the mobility of students and lecturers from higher education institutions, with which institutional co-operation already exists:</p> <ul style="list-style-type: none"> • the Dept. of Geography, University of Zadar • the Dept. of Geography of the Faculty of Philosophy, University of Ljubljana • the Faculty of Philosophy, University of Maribor • the Faculty of Science and Educational Sciences, University of Mostar (Bosnia-Herzegovina) • Eotvos Lorand University, Budapest (Hungary) • the Institute of Karst Research, Postojna (Slovenia) • the Leibniz Institute of Geography, Leipzig (Germany) • the Institute of Geography of the Faculty of Science in Potsdam (Germany) • the University of Natural Resources, Vienna (Austria) • the Institute of Geography and Spatial Planning, St Gallen University (Switzerland) • the Environmental Centre, Lancaster University (UK) • the Countryside and Community Research Unit, University of Gloucestershire (UK) • the Physical Geography Laboratory and the Environmental Centre, Blaise Pascal University and Limoges University (France) • the Institute of Geography, Bulgarian Academy of Science, Sofia (Bulgaria) <p>The Dept. of Geography has also successfully implemented the mobility of its lecturers and associates with the aim of research and continuous advanced learning, and the exchange of experience in the preparation of new projects. At least two university lecturers from abroad take part in teaching at the Dept. of Geography every year.</p>
<p>2.6. Relationship with the local community (economy, entrepreneurship, civil society, etc.)</p>	<p>Geography Teaching Practice is implemented at the Mladost Elementary School, the Fran Galović Elementary School, the Ljubljanica Elementary School, the Jabukovac Zagreb Elementary School, the Tin Ujević Elementary School, the 1st Grammar School, the 4th Grammar School and the 11th Grammar School – all exercise schools. In that</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	way, the Integrated Undergraduate and Graduate University Study of Geography and History, course: Education ,is linked with the economy and the local community.
2.7. Compatibility with requirements of professional organizations	The proposed Integrated Study Programme is coordinated with the Statute of the Croatian Geographical Society – the umbrella professional organisation of geographers in Croatia.
2.8. Name possible partners outside the higher education system that expressed interest in the study programme	Elementary school and secondary school institutions outside the system of higher education for the Integrated Undergraduate and Graduate University Study of Geography and History have distinguished themselves. They are the Agency of Education, the National Centre for External Evaluation of Education, and the Agency for Vocational Education and Adult Education.
2.9. Other (as the proposer wishes to add)	

3. GENERAL INFORMATION	
3.1. Scientific/artistic area of the study programme	Interdisciplinary areas of science, the field of Geography
3.2. Duration of the study programme (is there an option of distance learning, part-time studying, etc.)	The study period lasts five years (10 semesters), there are no possibilities for distance learning and part-time study, although a demand exists on the labour market for part-time study.
3.3. The minimum number of ECTS required for completion of study	300 ECTS scale grades
3.4. Enrolment requirements and admission procedure	Completed four-year secondary school having passed the mandatory State Matriculation exams (Croatian Language, a foreign language, Mathematics) and the electoral State Matriculation subjects (mandatory passing of Geography). Candidates are ranked in the differentiation process by NISpVU according to a) secondary school results..., b) the State Matriculation exams passed (Croatian Language, Mathematics, a foreign of classical language, Geography, History, Biology or Chemistry or Physics), and c) the candidate's additional achievements (results achieved in State competitions during secondary school education, results achieved in County competitions during secondary school education).
3.5. Learning outcomes of the study programme (name 15-30 learning outcomes)	<p>Professional knowledge, skills and abilities:</p> <p><u>Knowledge and understanding of:</u></p> <p>Terminology, basic definitions and principal theories in geography and in history.</p> <p>Fundamental methodology in geography and history.</p> <p>Appropriate statistics and graphic techniques.</p> <p>Fundamentals in cartography and map elements.</p> <p>Elements and factors in physical geography and their interrelationship, geosystems of various spatial levels.</p> <p>The causes and consequences of spatial distribution of the population, settlements and economic activities in the</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

world today.
Urban and rural spatial systems, their structural and functional characteristics.
Systems and models in economic geography, development factors, structure and dynamics of local, regional, national and global economies.
Globalization processes.
Causality relations between the elements and factors of society and the natural environment.
Historic and modern geography of Croatia and Europe.
The appearance and development of early civilizations.
Antic Greek and Roman societies and their influences and traces in Croatia.
The medieval, early modern age and 19 Century history of the World, Europe and Croatia.
World, Europe and Croatia in the first half of the 20th century.
Modern history of the World, Europe and Croatia.
History of historiography and theories and methods of modern historiography.
Theory of pedagogy and didactics.
Sociology and psychology in education.
Geography and history teaching methodology.
Elements needed for class preparation, conduction, evaluation and administration in school education.
Legislation in the field of education.

Cognitive abilities and skills:
Applying knowledge in determining, defining and solving spatial problems of medium complexity.
Ability to demonstrate the knowledge and understanding of essential facts, principles and theories in geography and history
The ability to interpret and discuss actual problems and processes relevant in geography and history.
The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials.
The ability to evaluate pupil's accomplishments and grade them.
The skills needed for evaluation, interpretation and synthesis of relevant information.
Teaching skills in various teaching forms and methods.

Practical abilities and skills:
Orientation in space and other skills needed in fieldwork.
Recognition and evaluation of historical traces in the contemporary landscape.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Evaluation and utilization of written historical sources. Recognition and utilization of geographic information. Mapping of geographic data. Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the results. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the results. Skills related to the usage of education materials and apparatus.</p> <p>Generic abilities and skills: Conducting literature research and use databases and other sources of information. Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement. Skills related to the communication process in education.</p>
<p>3.6. Employment possibilities (list of potential employers) and opinion of three organizations associated with the labour market on the adequacy of anticipated learning outcomes (attach)</p>	<p>The Provider of the qualifications is trained for work in education in Geography and History in primary and secondary schools, and in the general assignments in education in public service. Opinions three organizations are attached to the study.</p>
<p>3.7. Possibilities of continuing studies at a higher level</p>	<p>After completion of the Integrated Undergraduate and Graduate University Study of Geography and History, students may enrol in the Postgraduate Doctoral Study of Geography that represents a continuity of the Graduate Study established as far back as in 1960/1961, which has been expanded, augmented with new subjects and innovated since then. The Postgraduate Doctoral Study of Geography lasts for three years, and the academic level attained on its completion is Doctor of Science (DSc). Students may also enrol in doctoral study at some other universities and in some other doctoral study programmes in Croatia and abroad.</p>
<p>3.8. If submitting proposals for graduate studies, name undergraduate studies of the proposer or other institutions that qualify for admission to the proposed graduate study</p>	<p>-</p>

<p>4. DESCRIPTION OF THE STUDY PROGRAMME</p>	
<p>4.1. List of mandatory and elective courses and/or modules with class hours and ECTS credits (appendix: Table 1)</p>	
<p>4.2. Description of each course (appendix: Table 2)</p>	

DETAILED PROPOSAL OF THE STUDY PROGRAMME

4.3. Structure of the study (number of semesters, trimesters, class size for lectures, seminars, exercises)	Number of semesters: 10 Size of lecture groups: 20 students Size of groups for exercises/seminars: 20 students
4.4. Requirements for enrolment in successive semesters or trimesters	<p>In keeping with the Regulations on Study at the Faculty of Science and the Faculty of Philosophy of the University of Zagreb.</p> <p>For enrolment in all subjects in the following year it is necessary to have passed all the examinations in the previous year. If the student has failed to pass all the prescribed subjects from a particular study year, he/she may enrol once again in the failed subjects in the following year and his/her ECTS scale grades shall be calculated as being encumbered [with an outstanding obligation], which means that he/she can enrol in subjects from subsequent years of study (under the condition that he/she has passed the foregoing prescribed subjects), up until fulfilment of the total encumbrance of 35 ECTS scale grades at the most.</p> <p>The preconditions (the preceding subjects) for enrolment in individual subjects (the subsequent subjects) shall be noted ahead of the appertaining tables that contain the Lecture Schedule. In order to enrol in the subsequent subject according to the programme in the semester that immediately precedes it, it shall be necessary merely to attend lectures on the preceding subject, and to pass that subject prior to the subsequent one.</p>
4.5. List of courses and/or modules that the student can take in other study programmes	<p>Students of the Integrated Undergraduate and Graduate University Study of Geography and History may choose electoral subjects from the list of Geographical Electoral Subjects in Undergraduate University Study of Geography course: research, subjects from Regional Geography and the geography of similar sciences from the list of Geographical Electoral Subjects in the Undergraduate University Study of Geography as well as subjects from the list of pedagogical-psychological-methodological subjects in Graduate University Study of Geography, course: Education. Extra-curricular students may also enrol in other subjects at sectors of the University of Zagreb in agreement with the subject lecturer.</p>
4.6. List of courses and/or modules offered in a foreign language as well (name which language)	No courses are offered in a foreign language.
4.7. Completion of study:	
<i>a. Final requirement for completion of study</i>	Final thesis <input type="checkbox"/> Diploma thesis X <input checked="" type="checkbox"/> Final exam <input type="checkbox"/> Diploma exam X <input checked="" type="checkbox"/>
<i>b. Requirements for final/diploma thesis or final/diploma/exam</i>	All exams passed and all other obligations foreseen by the programme and a Diploma Thesis certified by the mentor/supervisor.
<i>c. Procedure of evaluation of final/diploma exam and evaluation and defence of final/diploma thesis</i>	The procedure commences with submission of the Graduate/Diploma Thesis theme of the student's own choice (on the appropriate form from the Student Office of the Dept. of Geography) as agreed with the lecturer – supervisor. The student shall be obliged to submit the Diploma Thesis theme to the Asst. Head Lecturer prior to the last sitting of the Dept. of Geography Council (the VGO) at the latest, in the semester prior to the one in which he/she shall be

DETAILED PROPOSAL OF THE STUDY PROGRAMME

defending his/her Diploma Thesis. In agreement with the supervisor and in keeping with the general guidelines of the Dept. of Geography, the candidate shall commence work on the Diploma Thesis in an optimal scope of 50 pages. The main objective of the Diploma Thesis in the Integrated Undergraduate and Graduate University Study of Geography and History, course: education, shall be the transfer of technical projects in the teaching content, which shows the level of acquired professional, methodical, didactic and pedagogical competencies. On condition that the student has passed all the prescribed examinations and fulfilled all other mandated study obligations, at the approval of the supervisor and subsequent to two revisional perusals at the most of the student's Diploma Thesis, a spiralled bound copy of the student's Diploma Thesis shall be deposited at the Student Office of the Dept. of Geography/Dept. of History by 5 working days at the latest prior to the meeting of the VGO/VOP at which a three-member committee shall be elected to assess the defence of the Diploma Thesis. The Diploma Thesis Committee may request additional changes and approve the compilation of a final version of the thesis and set a date for its defence. The defence date shall be made public over at least one week. Prior to such defence, the student shall be obliged to deposit at least one final copy with the Student Office of the Dept. of Geography/Dept. of History, and such version shall be in a hard copy and accompanied by a digital version, for the library archive. Defence of the thesis shall consist of a brief presentation of the paper, lasting no longer than 20 minutes, and oral responses to the question of the Committee's members, which shall relate to the paper, but could also encompass mandatory material from the overall study programme. The defence procedure shall last for 60 minutes at the most. The Committee shall separately assess the Diploma Thesis and the oral part of the examination and shall on that basis (but not necessarily by taking an arithmetic mean of those two grades) issue its final assessment of the Diploma Thesis. The supervisor shall enter the final grade in the student's Index/Graduation Book and in the ISVU [Information System of Higher Education].

	Prevention of Bullying and Hazardous Behaviour	T. Ljubin Golub	1	1	0		4	Elective	

LIST OF REQUIRED COURSES									
Year of study: 5 th									
Semester: 9 th									
MODULE	COURSE	COURSE TEACHER	L	S	E	e-learning	ECTS	Required/elective	
	Geographic Aspect of Globalization	Z. Stiperski	2	1	0	0	3	Required	
	Teaching Methodology of Geography I	Z. Curić	4	0	0	0	5	Required	
	Geographical elective 6						3	Required	
	Fundamentals of Psychology of Education	T. Ljubin Golub	2	2	0	0	8	Required	
	History Teaching Practice	D. Modrić-Blivajs, S. Koren	0	2	0	0	5	Required	
	Diploma Seminar I	*	0	2	0	0	6	Required	

* Lecturer at the students' choice. The Graduate/Diploma Seminar encompasses choice of mentor/supervisor, consultations with the supervisor on the theme of the Diploma Seminar, compilation of the Diploma Seminar concept and mandatory submission of the Diploma paper theme, after which the chosen supervisor shall confirm with his/her signature in the student's Index/Graduation Book that obligations have been fulfilled.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

LIST OF GEOGRAPHICAL ELECTIVE COURSES									
Year of study: 5 th									
Semester: 9 th									
MODULE	COURSE	COURSE TEACHER	L	S	E	e-learning	ECTS	Required/elective	
	Geography of Southeast Europe	D. Pejnović	3	0	0		3	Elective	
	Geography of East Asia	D. Njegač	2	1	0		3	Elective	
	Geography of Anglo-America	L. Šakaja	2	1	0		3	Elective	
	Geography of Latin America	S. Faivre	2	1	0		3	Elective	
	Geography of Australia and Oceania	A. Filipčić	2	1	0		3	Elective	
	Computer Use in Teaching Geography	D. Spevec, R. Vuk	1	0	2		3	Elective	
	E school of Geography	S. Faivre	0	0	3		3	Elective	
	Introduction to Astronomy	K. Pavlovski	2	1	0		3	Elective	

LIST OF REQUIRED COURSES									
Year of study: 5 th									
Semester: 10 th									
MODULE	COURSE	COURSE TEACHER	L	S	E	e-learning	ECTS	Required/elective	
	Teaching Methodology of Geography II	R. Vuk	1	3	0		5	Required	
	Geography Teaching Practice (90 hrs/p.a.)	R. Vuk					6	Required	
	Communication in Education	D. Miljković	2	2	0		5	Required	
	History elective course 5						3	Required	
	Diploma seminar II, master thesis with defence						11	Required	

For basic guidelines on the Diploma Exam see the Lecture Schedule and the Dept. of Geography Internet pages.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

**Table 2. Course description
REQUIRED COURSES**

1. GENERAL INFORMATION			
1.1. Course teacher	Ksenija Bašić	1.6. Year of the study programme	1 st
1.2. Name of the course	Statistical and Graphical Methods in Geography	1.7. Credits (ECTS)	7
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	45+0+15+0 (2+0+15+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Knowledge of the basic statistical and graphical methods, that should enable the students to use scientific literature, to learn specific methods of particular geographic disciplines, to work statistical data for their description and analysis, to make conclusions on the features of the analyzed phenomena, to plan scientific research.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, abilities and skills Knowledge and understanding of appropriate statistics and graphic techniques.</p> <p>Cognitive abilities and skills: The skills needed for evaluation, interpretation and synthesis of relevant information.</p> <p>Practical abilities and skills: Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Generic abilities and skills: Conducting literature research and use databases and other sources of information. Functioning effectively as an individual and as a team member.</p>					
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Understanding the role of statistical and graphical methods in geographic research. Knowledge of the systematization of graphical methods and the basic rules of their presentation. Ability to gather information to form data sets. Tables and graphical presentation of data sets. Knowledge and application of the indicators of distribution of frequencies. Knowledge and application of the model of linear regression. Knowledge of the types of thematic maps and their application in geography.</p>					
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>1 Objectives, contents and learning outcomes of the course; concept an the plan of work; evaluation of the students achievements. 2 The notion of statistics. Basic definitions. 3 Systematization of graphical methods and the basic rules of their presentation. 4-5 Formation of data sets. Tables and graphical presentation of data sets. 6-7 Relative numbers. 8-9 Measures of central tendency. 10-11 Measures of variability. 12 The Lorenz curve. 13 Simple linear regression. Correlation. 14 Linear trend. 15 Thematic maps.</p>					
<p>2.6. Format of instruction:</p>	<p>X lectures <input type="checkbox"/> seminars and workshops X exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work</p>	<p><input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)</p>	<p>2.7. Comments:</p>			
<p>2.8. Student responsibilities</p>	<p>Regular class attendance, 10 exercises, 4 colloquiums.</p>					
<p>2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS</p>	<p>Class attendance</p>		<p>Research</p>		<p>Practical training</p>	
	<p>Experimental work</p>		<p>Report</p>		<p>Exercises</p>	<p>1</p>
	<p>Essay</p>		<p>Seminar essay</p>		<p>(other)</p>	
	<p>Tests</p>	<p>3</p>	<p>Oral exam</p>	<p>1</p>	<p>(other)</p>	

DETAILED PROPOSAL OF THE STUDY PROGRAMME

credits is equal to the ECTS value of the course)	Written exam	2	Project		(other)	
2.10. Grading and evaluating student work in class and at the final exam	Evaluation of exercises and colloquiums, written and oral examination.					
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the library		Availability via other media
	Šošić, I., Serdar, V., 2002: <i>Uvod u statistiku</i> , Školska knjiga, Zagreb.			10		yes
	Šošić, I., 2006: <i>Primijenjena statistika</i> . Školska knjiga, Zagreb.			10		yes
	Papić, M., 2014: <i>Primijenjena statistika u MS Excelu</i> . Zoro, Zagreb.			10		yes
	Šterc, S., 1990: <i>Grafičke metode u nastavi</i> . Školska knjiga, Zagreb.			10		yes
2.12. Optional literature (at the time of submission of study programme proposal)	Petz, B., 2007: <i>Osnovne statističke metode za nematematičare</i> . Slap, Jastrebarsko. Šošić, I., 1998: <i>Zbirka zadataka iz statistike</i> . Mikrorad, Ekonomski fakultet, Zagreb.					
2.13. Quality assurance methods that ensure the acquisition of exit competences	In accordance with the Rule book and Manual of quality management at the University of Zagreb and the Faculty of Science.					
2.14. Other (as the proposer wishes to add)						

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Anita Filipčić	1.6. Year of the study programme	1 st
1.2. Name of the course	Climatology	1.7. Credits (ECTS)	4
1.3. Associate teachers	Mladen Maradin	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+0+15+0 (2+0+1+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The main learning objective is capability for geographical interpretation of climatological research results. Making use of climatic factors and their influence on the climatic elements students are supposed to be able to explain the causes of differences between the different climates as well as their intensity and consequences. Beside students are informed about basic graphical and statistical methods in climatology as well as the searching the literature.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	Developing of cognitive, practical and generic abilities and skills: knowing and understanding interactions between climate, relief and waters, knowing and understanding interactions between natural and social landscape components, getting professional competencies from core science, developing competencies for research work.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>Knowing and understanding geosystem interactions.</p> <p>Knowing and understanding interactions between climate and human activities.</p> <p>Knowing and understanding the basic climatic elements and their distribution on the Earth.</p> <p>Understanding and interpretation of causes of climatic differences on the Earth.</p> <p>Understanding and coordinating climate features and human activities.</p> <p>Understanding and applying the climate elements effect on the spatial planning.</p> <p>Knowing and understanding regional climatic differences in Croatia.</p>		
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<p>1. The content of climatology. Weather and climate. Climatology and geography. The climatic elements and factors.</p> <p>2. Atmosphere. Chemical composition of the atmosphere. The vertical structure of the atmosphere.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>3. The energy balance. Radiation.</p> <p>4. The air temperature. The thermal features of land mass and the sea. Geographical distribution of air temperature.</p> <p>5. Motion in the atmosphere. The air pressure. The air masses and climatic fronts. The geographical distribution of the winds.</p> <p>6. Moisture in the atmosphere. The water vapour. Fog, clouds and cloudiness.</p> <p>7. The geographical distribution of precipitation. Drought and desertification problems.</p> <p>8. The circulation of the atmosphere. The types of circulation. Local and regional air circulation.</p> <p>9. Mid-latitude circulation. The air disturbances and thunderstorms.</p> <p>10. The general air circulation. The geographical importance of the monsoon circulation.</p> <p>11. The global climate system. The climate classification. Climatic indices. Climate classification after Koeppen.</p> <p>12. The climate change. Climate fluctuation and climate variation. The climate change in the instrumental period. Historical and holocen climate change. The wuerm climate.</p> <p>13. The climate of kenozoic glaciation. The climate in the geological time. The causes of climate change.</p> <p>14. The anthropogenic influences related to climate.</p> <p>15. The climate of Croatia.</p>				
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input checked="" type="checkbox"/> field work	<input type="checkbox"/> independent assignments <input checked="" type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:		
2.8. Student responsibilities	Class attendance, short term exams, exercises done.				
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	0.50	Research		Practical training
	Experimental work		Report		(other)
	Essay		Seminar essay		(other)
	Tests		Oral exam	2.00	(other)
	Written exam	1.50	Project		(other)
2.10. Grading and evaluating student work in class and at the final exam	Attendance to class, exercises, short term written exams, oral exam. The final grading depends on oral exam and written short exams.				
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the library	Availability via other media
	Šegota, T., Filipčić, A., 1996: <i>Klimatologija za geografe</i> . Udžbenici Sveučilišta u Zagrebu. Školska knjiga, Zagreb.			10	yes

DETAILED PROPOSAL OF THE STUDY PROGRAMME

2.12. Optional literature (at the time of submission of study programme proposal)	Oliver, J. E. (ed.), 2008: <i>Encyclopedia of world climatology</i> . Springer, Dordrecht.		
2.13. Quality assurance methods that ensure the acquisition of exit competences	In accordance with the Rule book and Manual of quality management at the University of Zagreb and the Faculty of Science.		
2.14. Other (as the proposer wishes to add)			

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Danijel Orešić	1.6. Year of the study programme	1 st
1.2. Name of the course	Hydrogeography	1.7. Credits (ECTS)	4
1.3. Associate teachers	Ivan Čanjevac	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Acquiring fundamental knowledge of water and its geocologic role, of hydrosphere and its waters, especially of rivers, catchments and discharge regimes. Knowledge of Croatian hydrogeography, Understanding water resources and their role in modern societies.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, abilities and skills: <u>Knowledge and understanding of:</u> Geographic terminology, definitions and theories. Applying of methodology in geography and current investigations in its field. Geographical distribution and usage of water resources. Elements and factors in physical geography and their interrelationship in geosystems on various spatial levels. Causality relations between the elements and factors of natural environment and society. Concept of regional and sustainable development.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. The ability to interpret and discuss relevant and actual geographic problems and processes. The skills needed for evaluation, interpretation and synthesis of relevant information. The skills needed for presenting scientific contents and stances in written and oral form.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Practical abilities and skills: Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results.</p> <p>Generic abilities and skills: Problem solving, relating to qualitative and quantitative geographic information. Conducting literature research and use databases and other sources of information. Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Continuous professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Knowing and understanding hydrogeographic terminology, definitions and theories. Understanding water as an element in physical geography. Knowing the characteristics and genesis of different land waters appearance forms. Knowing and understanding fundamental causal relations between waters and societies. Knowing and determining elements of rivers and basins; basics of calculating river basin water balance. Knowing Croatian hydrogeography. Knowledge and ability to interpret and discuss the need for water resources conservation and awareness about water as a strategic good in 21st century. Ability of independent acquiring, compiling and interpreting of basic hydrologic data. Applying river regime classification according to Parde. Skills and abilities to produce water stage and discharge graphs. Skills and abilities of fieldwork discharge measuring.</p>
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1 The position and role of hydrogeography. 2 Properties of water and its geoecologic role. 3 and 4 Genesis of Earth's atmosphere, hydrologic cycle and hydrosphere. 5 and 6 Distribution of waters on Earth, water balance on Earth, availability of drinking water. 7 Ground water. 8 Ice and snow. 9 Lakes and wetlands. 10 Rivers

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>11 Cathment (basin) and its elements. 12 River regimes, classification according to Parde. 13 and 14 Croatian hydrogeography 15 Water as a strategic good in 21st century, conflicts and agreements about the usage of water resources.</p> <p>exercises: 1 Data sources in hydrology and hydrogeography. 2 Water stage data measuring and interpretation, producing water-level graphs. 3 and 4 River discharge data, simple and professional measuring, data interpretation, stage - discharge relationship. 5 Producing and interpreting hydrographs. 6 and 7 River measuring and calculating river elements. 8 River network, working on orohydrographic maps. 9 and 10 Stream ordering, classifications (Gravelius, Horton, Strahler, Pfaffstetter). 11 Water balance in a river basin; calculating precipitation amounts. 12 Waters in Croatia, working with maps. 13 Water consumption in Croatia, spatial and temporal variations. 14 and 15 Fieldwork.</p>						
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input checked="" type="checkbox"/> field work	<input checked="" type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:				
2.8. Student responsibilities	Attendance to class, completed exercises.						
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	0,4	Research		Practical training	0,4	
	Experimental work		Report		(other)		
	Essay		Seminar essay		(other)		
	Tests		Oral exam	1,2	(other)		
	Written exam	2,0	Project		(other)		
2.10. Grading and evaluating student work in class and at the final exam	Written evaluation, oral examination. Attendance to class 10 % + exercises 10 % + written examination 50 % + oral examination 30 %						
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the	Availability via other media		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Zrinka Nikolić Jakus	1.6. Year of the study programme	1 st
1.2. Name of the course	Historiographic Practicum	1.7. Credits (ECTS)	6
1.3. Associate teachers	Hrvoje Gračanin, Ida Ograjšek Gorenjak	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+30+0+0 (2+2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Developing abilities and skills of collecting sources and literature, and the seminar and later a master's thesis.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	Finding sources and literature, structuring and drafting work featured scientific notes and bibliography.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Introduce the basic terminology that is encountered in historical science; 2. Inform the basic collection of historical sources; 3. Inform the main institutions (libraries, archives, museums) important for the profession; 4. Learn to find sources and literature required for study and possible subsequent scientific work; 5. Learn several systems of writing scientific notes and bibliographic resources; 6. Learn to structure and suitably equipped seminar or master thesis; 7. Learn to recognize and avoid plagiarism.		
2.5. Course content broken down in detail by weekly class schedule (syllabus)	1st week. Introduction. History, history and historiography. The branches of historical science. 2nd week. Auxiliary historical sciences. Sources and references. Types of historical sources. The most important collections of historical sources. 3rd week. Search for sources and literature. Encyclopaedias and lexicons. Libraries. Internet. - Student commitments: application threads bibliography 4th week. The choice of research topics. The structure of research and work. 5th week. Writing bibliographic units. - Student commitments: application threads display		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>6th week. Writing scientific notes. 7th week. Exercises. 8th week. Scientific publications. Classification of articles and other research units. - Student commitments: application of the topic of the seminar (up to 6 cards with the scholarly apparatus - the notes and bibliography) 9th week. Plagiarism. 10th week. Databases. 11th week. Exercises. - Student obligations: surrender bibliography 12th week. Archives. - Student obligations: surrender display 13th week. Museums. 14th week. Written exam. - Student obligations: surrender seminar paper</p>																																		
2.6. DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Boris Olujić	1.6. Year of the study programme	1 st
1.2. Name of the course	History of Early Civilizations	1.7. Credits (ECTS)	2/4
1.3. Associate teachers	Inga Vilogorac Brčić, Jasmina Osterman	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+0/30+0+0 (2+0/2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required (lecturer), Seminars (elective)	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The aim of the course is to enable students to understand the most important processes in the historic longevity space, which formed the first organized society. Subject them to get to know the basic terminology and chronology, modern paradigms and possible theoretical and practical approaches in the research of the oldest history of humanity. One of the most important objectives of the subject that the student points to the independent work (work in literature, work on the sources).		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	The course prepares students for independent research and reflection on history. An interactive approach, referral of students to practical work and preparation of written papers and essays, practical work on the sources. Course content also refers to an interdisciplinary approach. The scope of material specific theme, dependence on the results of archaeology, anthropology, ethnology, various natural sciences, placed in front of the student high demands. First it is a necessary theoretical training in understanding the development of civilization, from the beginning of its. The proposed mode and asks the student and teacher constant activity and cooperation.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Developing a critical, analytical and interpretative skills of students the art of problem conceptualization. Developed skills of oral and written expression. Lectures will get an overview of interrelated phenomena, such as technological development, urbanization, traffic connections, and the emergence of global empires, the problem of ethnicity and ethnic identity, conceptualization of religious and mythological world and others. The seminar theme follows the lecture and discusses them. Seminar prepare students for practical work on the understanding and interpretation of various literary and archaeological sources, and to reflect the possible methodological approaches and theoretical models.		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

2.5. Course content broken down in detail by weekly class schedule (syllabus)

The subject of the comparative, diachronic and synchronic, traces the historical development of several ancient civilizations foci, such as Egypt, Mesopotamia, Syria, Iran, Anatolia and the Eastern Mediterranean. The emphasis is not on factual overview, but the understanding of historical processes, change, continuity and discontinuity of human life in space.

Work schedule:

Week 1:

Lecture: Introduction to the problems of the old history. Talk with the students, to introduce students to the work mode, the basic literature, exams, etc. View the history of the oldest history of humanity, the state of historiography today: theoretical approaches and scientific disciplines that study the various aspects of the history of early civilizations. Introduction to basic chronological guidelines, scientific methods and approaches to research ancient history.

Seminar: The organization of the working groups and presentation of the work plan. In the first seminar, the emphasis is on getting to know the method of work, literature and the structure and appearance of seminar papers (writing term papers, literature, notes, papers and other structures.), A list of topics.

Week 2:

Lecture: Defining spatial and chronological boundaries within which will be held teaching of the history of early civilizations. The conditions in which they were created first civilization: this will lesson for special attention to be paid to geomorphological, climatic and vegetation characteristics of the area of Mesopotamia, Anatolia, Syria, Iran, Eastern Mediterranean, and North Africa. Palaeolithic in this area.

Seminar: The second seminar, students choose topics of the seminar, during which work practical works: 1. innovation and the role of technology in the development of humanity; 2nd religious history of the ancient near east (work on sources); 3rd urbanization of the old world; Fourth interpretation of archaeological resources in researching the history of early civilizations. Problematization space as a factor of historical development. Interaction between the environment and the development of technology, religious conception, the formation of cities, more complex forms of social organization.

Week 3:

Lecture: Neolithisation old East: the beginnings of agriculture and animal breeding, organizing the first major settlements, a network of mutual contacts between remote spatial units (exchange, contacts, influences). View the focal zone Neolithization this area, basic chronological guidelines.

Seminar: This seminar problematize the characteristics of technological development Neolithic communities: cultivation practices, production of baked earth, different types of stone, wood, and in general organizations and societies, the spiritual world (procedure with the dead-traces of funeral rituals, different religious conceptions etc.).

Week 4:

DETAILED PROPOSAL OF THE STUDY PROGRAMME

Lecture: This lecture most attention is given to the period from the 5th to the 3rd millennium BC, the key to understanding the origins of the first great civilizations "Fertile Crescent" (from Egypt to Mesopotamia). The formation of the first large urban agglomeration, the creation of social elites that manage resources (construction of canals, organizing commercial networks). Mastering the technology of metals (copper, bronze), construction of canals, the emergence of letters, pottery wheel, wheels and other technological innovation (Copper Age). Period Nagada in Egypt and periods Obeid and Uruk in Mesopotamia
Seminar: For this thematic unit by the seminar papers that examine the interplay between social and economic development and technological innovations that facilitate the management and organization of the company (letters phenomenon caused by the need for easier maintenance and construction of canals and generally for easier system management; invention of the potter's wheel, innovation in Construction etc.). The new urban areas occupy a special place temple complex. Temples and cults in general and the development of religion, in this period, there will be also devoted several term papers.

Week 5:

Lecture: Creating great Egyptian state during the third millennium BC (The old state and the first interim).

Seminar: Work on written and archaeological sources: Pyramid texts, the concept of the afterlife, the construction of the temple and burial complex, construction of channels, texts crisis.

Week 6:

Lecture: 3rd millennium in the area of Mesopotamia: first dynasty, Akkad, III. Dynasty of Ur. The unification of space between the rivers in large government entity. The early history of the southwestern Iran, eastern Mediterranean and Anatolia, in the light of contacts with the area of Mesopotamia and Egypt.

Seminar: The urbanization of Mesopotamia in the third millennium. Analysis rich written heritage of this period (texts of religious content, historical texts, inscriptions, etc.). Confrontation archaeological and written sources.

Week 7:

Lecture: Syria and Mesopotamia in the first half of the 2nd millennium BC Mari, Ebla, Early Babilon kingdom, Early Asiria state.

Seminar: Legal texts and codes in the area of the old East. Cosmogonic and teogonic conception of religion in Mesopotamia: epic Enuma Eliš and others.

Week 8:

Lecture: Central State and the first interim (first half of the 2nd millennium BC in Egypt).

Seminar: Urbanization Egypt: Thebes, Memphis. Egyptian literary heritage of this period.

Week 9:

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Lecture: New Egyptian State: expansion and the period of crisis. Seminar: Archives in Tel El Amarna and international relations</p> <p><u>Week 10:</u> Lecture: Late Bronze Age in the ancient near east, 15th-12th century BC. Global ideological concepts (title great king, the king as God's vicar on earth, and the high priest), the creation of large countries, internationalization and the creation of intense diplomatic contacts Hittite kingdom, the Egyptian state, Assyria, Babylonia, the Elamite kingdom. The advance of the "People of the Sea", the collapse of Hittite state. Seminar: Trade Mediterranean: actors, production centers, the most important trade routes.</p> <p><u>Week 11:</u> Lecture: Egyptian history from the beginning of the first millennium to Saiske dynasty (664 BC). Seminar: Assyrian conquest of Egypt 671 BC.</p> <p><u>Week 12:</u> Lecture: A lot of Assyria (934th to 612th BC). Creating a global empire. Seminar: Political Marketing and ideological concepts of Assyrian kings royal inscriptions and stelae. Big cities: Nineveh, Ashur, kalh (Nimrud), Dur Sharrukin (Korsabad), Babylon.</p> <p><u>Week 13:</u> Lecture: The New Babylon State (626-539) and the beginning of the expansion of the Persians Seminar: Battle of Carchemish (605th BC); Phoenicians - cities, trade, religion and cults; Phrygia and Lydia.</p> <p><u>Week 14:</u> Lecture: History of the Persian Empire (6th-4th century BC). Start the Hellenistic period in the area of the old East. Seminar: Concluding topics, evaluation of student participation in the seminar.</p>

2.1. Course objectives	To introduce the subject of research demographic, the basic theory and approaches. Explain the importance of population to overall development and organization of space. Develop skills for the implementation of methods and techniques of demographic research. To develop the ability to interpret the development of the Croatian population and the world, natural, physical and overall population trends, population structure and impact on the population and environment. Develop competencies for the transfer of scientific knowledge demogeography in teaching geography in primary and secondary schools.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, skills and abilities:</p> <p><u>Knowledge and understanding of:</u> Terminology, basic definitions and principal theories in geography and in history. Fundamental methodology in geography. Appropriate statistics and graphic techniques. Fundamentals in cartography and map elements. Causal connection between elements and factors natural base and social superstructure.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium complexity. The ability to interpret and discuss actual problems and processes relevant in geography and history.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>The skills needed for evaluation, interpretation and synthesis of relevant information. Skills in presenting scientific materials and arguments in writing and orally. Ability to represent knowledge and understanding of essential facts, concepts, principles and theories in geography and history The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials..</p> <p>Practical abilities and skills: Mapping of geographic data. Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the results. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the results. Recognising and using geographic information.</p> <p>Generic abilities and skills: Solving tasks related to the qualitative and quantitative geographical and historical information. Conducting literature research and use databases and other sources of information. Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> - Explain the subject of demographic, distinguish and apply the basic theories and approaches - Explain the regional, national and global levels for the general population of the importance of the development and organization of space - Apply appropriate methods and techniques of demographic research essay - Interpret the development of the Croatian population and the world, natural, physical and overall population trends, population structure and impact on the population and environment - Formulate scientific knowledge demographics for use in teaching geography in primary and secondary schools - Prepare the tasks of teaching content demography to check the development of cognitive and practical geographic skills in primary and secondary schools
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1 Objectives and course content, learning outcomes; concept and work plan; evaluation of the achievements of students. 2 The subject and method demogeography. Contemporary approaches. 3 Basic units in the study population and data sources. 4 Population Distribution on Earth. Population density. 5 Overview of the development of the world's population. Theoretical perspectives on the development of the population.

2. COUSE DESCRIPTION			
2.1. Course objectives	Introduce students to the medieval European history access modern historical science. The emphasis on understanding basic concepts, structures and processes. For students to encourage the construction of contemporary culture historical thinking. Training for self-reflection of European medieval history, providing a reference frame for movement through areas of specialist research or other historical periods and contents. Training for self-service to the relevant original documents and literature, which allows the students themselves to deepen and complement their knowledge.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	Basic general knowledge of historical facts, understanding of the historical process, the development of critical consciousness, basic skills for independent research, the ability of verbal and written communication of acquired knowledge.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Basic general knowledge of historical facts about the European Middle Ages, the understanding of historical processes in the European Middle Ages, the development of critical awareness of the historical sources and historiographical literature of the Middle Ages, is the ability for independent research topics from medieval history, the ability of verbal and written communication of acquired knowledge about medieval history. Ggeneral knowledge of historical facts, understanding of the historical process, the development of critical consciousness, basic skills for independent research, the ability of verbal and written communication of acquired knowledge.		
2.5. Course content broken down in	Week 1:		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

<p>detail by weekly class schedule (syllabus)</p>	<p>Lectures: Roman world in the 4th century. Political conditions, economic and social situation, literature, education and art, religion. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.</p> <p>Week 2: Lectures: The Decline of the Roman world in the West. Germanic tribes, the Germanic migrations, barbarian kingdoms in the West, Church of the Germanic kingdoms, forming the beginnings of Europe. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.</p> <p>Week 3: Lectures: The transformation of Rome in the East - the birth of the Byzantine Empire. From Theodosius to Anastasia - the Byzantines out of the crisis. The failure of Justinian restoration project of a single Roman Empire, Islam and the Arab conquest. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.</p> <p>Week 4: Lectures: An attempt to reconstruction at the time of Pepin the Short and Charlemagne. From the Merovingian to Pepin the Short, Pepin the Short and Charlemagne, the Carolingian Renaissance. Naval power in the Mediterranean: Venice. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.</p> <p>Week 5: Lectures: The collapse of the Carolingian Empire. The heirs of Charlemagne, the new barbarian intrusion, the new nations in Central and Eastern Europe: Russians, Czechs, Poles. What is feudalism? Village in the early Middle Ages, the church in feudal times. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.</p> <p>Week 6: Lectures: Bridges over the dark times. Civilization of the East - Byzantium and the Arabs. Reconstruction of the Western Empire. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.</p> <p>Week 7: Lecture: Recovering the West. Religious reconstruction, political reconstruction - France, Sicily and England, the economic recovery. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.</p> <p>Week 8: Lectures: The dominance of the Church in the West. Final Schism, the relationship of the Church and the Empire, the first</p>
---	---

DETAILED PROPOSAL OF THE STUDY PROGRAMME

Crusades, the strengthening of the Byzantine Empire for Komnenos, a reform movement within the Church in the 12th century, the rise of Europe - Renaissance of the 12th century. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.

Week 9:

Lectures: The Rise of Western monarchy. England and France in the 12th century. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.

Week 10:

Lectures: The Age of the fight to preserve the supremacy of the Church in society. Pope Innocent III, heresy (heresy) and mendicant orders, the papacy and Hohenstaufovaca dynasty, the later Crusades. The collapse of the Byzantine Empire and the fall of Constantinople in 1204, the restoration of the Byzantine Empire under Michael VIII Palaeologus. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.

Week 11:

Lectures: The spread of Christian Europe. Scandinavia and Central Europe in the High Middle Ages, Russia in the High Middle Ages. Baltic region in the 12th century, the emergence of Grand Duchy of Lithuania, first and second Mongol invasions, the Mongol rule over Russia. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.

Week 12:

Lectures: The rise of secular institutions and interests. Strengthening State - examples of France and England, lay in the 13th century; nobility, bourgeoisie and peasantry, intellectual and artistic creativity in the High Middle Ages. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.

Week 13:

Lectures: The loss of priority of the Church. Pope Boniface VIII, continued centralization in France and England, the Babylonian captivity Pope and the great schism in the Church, church councils and papal restoration. Seminar: Analysis of selected sources in the field that this week's lectures, comments and discussion.

Week 14:

Lectures: The failure of secular leadership. The dissolution of medieval society. England and France in the 14th and 15th centuries. German Empire and the Habsburgs, the creation of Spain, Scandinavia in the late Middle Ages. Poland and the Polish-Lithuanian union in the 14th and 15th centuries, Russia in the late Middle Ages, Great Principality of Lithuania and

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Neven Budak	1.6. Year of the study programme	1 st
1.2. Name of the course	Croatian Medieval History	1.7. Credits (ECTS)	5/7
1.3. Associate teachers	Zrinka Nikolić Jakus Trpimir Vedriš	1.8. Type of instruction (number of hours L + S + E + e-learning)	60+0/30+0+0 (2+0/2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	2
2. COUSE DESCRIPTION			
2.1. Course objectives	In the introductory part of the course, students will become familiar with the notion of Croatian middle ages, basic printed collections of the relevant sources, most important archival collections and historiography. Further, they will get to know most important issues in Croatian medieval history, as well as different methodological approaches to sources and literature. While the topics might slightly change from semester to semester – the basic issues to be discussed are: ethnogenesis, Christianization and ecclesiastical organization, development of principality and royal government, formation of nobility, ecclesiastical orders and their social roles, development of the towns and communal organization etc.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, skills and abilities: <u>Knowledge and understanding:</u> Terminology, basic definitions and principal theories in geography and in history. Fundamental methodology in geography and history. Appropriate statistics and graphic techniques. Causality relations between the elements and factors of society and the natural environment. The medieval history of the World, Europe and Croatia.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium complexity. Ability to demonstrate the knowledge and understanding of essential facts, principles and theories in geography and history The ability to interpret and discuss actual problems and processes relevant in geography and history.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials. The skills needed for evaluation, interpretation and synthesis of relevant information.</p> <p>Practical abilities and skills: Recognition and evaluation of historical traces in the contemporary landscape. Evaluation and utilization of written historical sources.</p> <p>Generic abilities and skills: Conducting literature research and use databases and other sources of information. Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Students will acquire basic knowledge about the Croatian middle ages, its research. They will acquire basic competences in the ways historians approach source and how they interpret them. They will be introduced to the notions of construction of history and will acquire the basic terminology of the Croatian middle ages.</p>
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Introductory remarks (duties, periodization) 2. Sources and historiography 3. What are the early middle ages? 4. The question of origins 5. Creation of the state 6. Christianization 7. Tomislav & 10th c 8. Ecclesiastical organization 9. Anarchy after Držislav and the history of early 11th c 10. Ecclesiastical reform and the benedictines 11. Society 12. Zvonimir & the time of dissolution 13. Slavonia – arrival of the Hungarians 14. First colloquium 15. What are high middle ages?(12th - 13th c.) 16. Continuation 17. Charles Robert & Louis Anjou 18. Anti-court movement – to 1409. 19. The age of decline 20. Nobility

2.14. Other (as the proposer wishes to add)	

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Martina Jakovčić	1.6. Year of the study programme	2 nd
1.2. Name of the course	Economic geography	1.7. Credits (ECTS)	5
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	45+15+0+0 (3+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	General aim of the course is to gain knowledge about position and role of economic geography in the context of geographic science. Course studies concepts, theoretic approach, and main models in economic geography and their application in geographic research. Emphasis is put on the importance of energy sources, trends in consumption, geographic consequences of their spatial distribution and problems of sustainability of consumption. Through explanation f factors which influence development of economic activities students will be able to understand and explain processes and problems in contemporary world. Students will gain basic knowledge that should use them as a basis for understanding specialist courses.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	Systems and models in economic geography, their structure, dynamics and development factors on various spatial levels. Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. Ability to explain and discuss relevant and actual geographic problems and processes. Mapping of geographic contents. Continuous professional development. Conducting literature research and use databases and other sources of information.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Knowledge of geographical terms, basic definitions, concepts, basic theoretic approaches and models in economic and geographic research. Apply methodology of economic geography in geographic research. Explain problems of energy usage in contemporary world (types, spatial distribution, trends in consumption, sustainability of energy sources.		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Extract elements and types of spatial systems at various spatial levels. Differ and explain spatial systems of certain economic activities. Explain dynamics and diversity of processes of transition at global and regional level. Apply relevant methods and actions in collection, processing and interpretation of spatial data. Apply knowledge in determination, and resolving spatial problems of medium complexity.</p>				
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Definition of economic geography, traditional and contemporary concepts, aim of the research and methods 2. Theoretic approaches and models 3. Energy – energy sources, spatial distribution, trends in consumption, sustainability part I. 4. Energy – energy sources, spatial distribution, trends in consumption, sustainability part I 5. Economic systems 6. General indicators of economic development 7. Spatial systems of primary economic sector, factors of development of agriculture, types of agricultural production 8. Spatial systems of secondary activities 9. Spatial systems of tertiary activities 10. Factors of development, dynamics and structure of world retail 11. Structure of retail in .S and Western Europe 12. Structure of retail in developing countries 13. Term and the model of transition o retail 14. Retail in cities 15. Baking, monetary and fiscal systems

course)	Written exam	3,0	Project		(other)	
2.10. Grading and evaluating student work in class and at the final exam	Notes on attendance of lectures, seminars and mapping and noting student activities. Final mark will be a result of a written exam and seminar essay.					
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the library		Availability via other media
	Aoyama, Y. et al., 2011: <i>Key concepts in Economic Geography</i> , Sage Publications, Los Angeles.			5		yes
	Coe, N. M. i dr., 2007: <i>Economic geography, contemporary introduction</i> , Blackwell, Malden – chapters 1 and 3.			5		yes
	Hudson, R., 2005: <i>Economic geographies</i> , Sage publications, London – chapters 8, 9 and 10.			5		yes
	Krugman, P. R., Obstfeld, M., 2009: <i>Međunarodna ekonomija. Teorija i ekonomska politika</i> , Mate, Zagreb – chapters 14, 20, 21 and 22.			10		yes
2.12. Optional literature (at the time of submission of study programme proposal)	Optional literature will be determined according to students preferences.					
2.13. Quality assurance methods that ensure the acquisition of exit competences	<p>Procedures outlined in <i>Regulations and Handbook on the Quality Assurance</i> at the University of Zagreb and the Faculty of Science:</p> <ul style="list-style-type: none"> - university and faculty student survey - teaching self-evaluation: modernizing and reassessment of course's goals and content, and strategy of teaching and learning; evaluation of learning outcomes by analysis of students level of success according to Student Office data and self-records - outgoing survey: integrated university study evaluation - interview with tutors in schools-training facility where students perform methodical practice 					
2.14. Other (as the proposer wishes to add)						

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Dražen Njegač, Vedran Prelogović	1.6. Year of the study programme	2 nd
1.2. Name of the course	Urban geography	1.7. Credits (ECTS)	5
1.3. Associate teachers	-	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Knowledge of the cities, their meaning in societies, processes in cities and urban regions, city impact on global development. Students have to be able to apply theoretical models and appropriate statistic and cartographic methods in the identification of intensity and meaning of phenomena and processes in the cities and urban regions.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, abilities and skills: <u>Knowledge and understanding of:</u> Urban geographic terminology, definitions and theories. Urban spatial systems, their structural and functional characteristics. Causality relations between the elements and factors of natural environment and society. Applying of methodology in geography and current investigations in its field.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. The ability to interpret and discuss relevant and actual urban geographic problems and processes. The skills needed for evaluation, interpretation and synthesis of relevant information. The skills needed for presenting scientific contents and stances in written and oral form. The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Practical abilities and skills: Skills needed in fieldwork. Mapping of urban geographic data. Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results.</p> <p>Generic abilities and skills: Problem solving, relating to qualitative and quantitative urban geographic information. Conducting literature research and use databases and other sources of information. Functioning effectively as an individual and as a team member. Continuous professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> -to explain the notions of city, urbanization, nodal region -to identify and compare stages of urbanization in Croatia and in the world -to analyze city functions on selected examples -to analyze spatial and functional structure as well as the social topography of the cities -to apply the methodology of urban geography in the analysis of local, national and global urban systems and the city influence on its surroundings -to evaluate the city influence on the transformation of its surroundings -to explain the central place organization
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Geographic notion of the city, development of urban geography. 2. Forms of urbanization. 3. Urbanizations of the world and Croatia. 4. City functions. 5. Functional classification of the cities. 6. Spatial-functional structure of the city. 7. Urban social structure. 8. Social topography of the city. 9. City morphology. 10. City as a system. 11. City and surroundings - suburbanization. 12. City and surroundings - metropolitanization. 13. Nodal and urban systems. 14. Central place theory.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

		15. City and globalization.			
2.6. DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Alan Moro, Đurđica Pezelj, Dražen Kurtanjek	1.6. Year of the study programme	2 nd
1.2. Name of the course	Geology	1.7. Credits (ECTS)	5
1.3. Associate teachers	Duje Kukoč	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+0+15+0 (2+0+1+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	<p>Learn the basic concepts and principles of mineralogy and petrology. Obtaining information about origin, properties and use of minerals and rocks. Developing skills (on the field and in the laboratory) of determination of minerals and rocks. Obtaining knowledge, skills and abilities to observe, analyse and interpret the facts related to geology, and use of these informations in the undrestanding different geological processes and phenomena.</p> <p>Introduce students with morphological characteristics, paleoecological requirements and evolutionary trends of various fossil groups, fossils as indicators of geological time and past environments, position of continents and climate change throughout geologic time.</p>		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowledge and understanding of: Geological terminology, definitions and theories. Applying of methodology in geology and current investigations in its field.</p> <p>Cognitive, practical and generic abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. The ability to interpret and discuss relevant and actual geological problems and processes. Orientation in space with modern technologies and other skills needed in fieldwork. Conducting literature research and use databases and other sources of information.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Continuous professional development.</p>		
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Students should be capable to: explain and describe internal order in crystals as well as crystal morphology; define and determine chemical and physical properties of minerals (identify and systematize); distinguish the main rock types and varieties inside of each group and explain their origin, describe the Earth's layers, explain the structure elements of the lithosphere, understand ground waters, recognize and explain the principal geological processes related to continents, seas and oceans, understand plate tectonics. Students will be able to incorporate fossil data in order to interpret and reconstruct depositional environment, including climate change throughout geologic time.</p>		
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ul style="list-style-type: none"> - Definition of mineral and mineralogy; internal order in crystals, crystallization, crystal habit; crystal systems; symmetry elements - Chemical properties of minerals (composition, isomorphism, polymorphism); mineraloids; physical properties of minerals (hardness, tenacity, specific gravity, cleavage, fracture, color luster, thermal, electrical and magnetic properties), systematization of minerals - Igneous rocks (Earth's interior; origin and composition of magma; texture and structure, composition and classification) - Sedimentary rocks (sedimentary cycle - weathering; erosion, transportation, deposition, lithification; texture and structure; composition and classification) - Metamorphic rocks (factors controlling the metamorphic processes - pressure, temperature, chemically active fluids; types of metamorphism; composition and classification) - Tectonic elements of the lithosphere (folds, faults) - Ground waters, porosity, springs, rivers, water in karst terrains - Lakes and swamps, deltas, estuaries, ocean basins, transgression and regression, glaciers - Wind, geological role of organisms, sedimentation, earthquakes - Tectonic plates, mountain belts - Fossils, how does an organism become a fossil, their importance in biostratigraphic zonations and paleoecology. geological time scale - Precambrian and lower palaeozoic era – the most important fossils and geological events. - Middle and upper palaeozoic era - the most important fossils and geological events. - Mesozoic era - the most important fossils and geological events. - Cenozoic era - the most important fossils and geological events. 		
<p>2.6. Format of instruction:</p>	<p>X lectures</p>	<p>X independent assignments</p>	<p>2.7. Comments:</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Nataša Štefanec, Nenad Moačanin	1.6. Year of the study programme	2 nd
1.2. Name of the course	Croatian Early Modern History	1.7. Credits (ECTS)	6
1.3. Associate teachers	Kornelija Jurin-Starčević	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+30+0+0 (2+2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Goal of the course is to make students familiar with the basic occurrences and processes in early modern history of Croatian lands, i.e. to qualify them for profound understanding and more integral evaluation of given period of time in wider regional context. Special emphasis is on providing of insight into structural peculiarities of individual segments of Croatian society as to develop critical way of thinking. Goal of seminar classes is to qualify students for independent work on original documents and referent literature, and also to develop the techniques of conceptualization and adequate written and oral presentations.		
2.2. Course enrolment requirements and entry competences required for the course	Medieval history of Croatia course examination passed and third semester enrolled.		
2.3. Learning outcomes at the level of the programme to which the course contributes	One of three obligatory courses in the third semester of the undergraduate level chronologically focused to the early modern period. Lectures are synthetic presentations of selected themes that include basic structures, processes and phenomena of early modern Croatian history and are open to communication with students. Seminar focuses to reading and critical analysis of selected (early modern) sources and working with reference literature. They result with a seminar essay on a selected topic. Within the course, a filed work is organized too. Generally, the course contributes to the program by introducing students to basic historical processes and events in early modern Croatian history and by interpreting them in wider regional context. It also trains students for a critical work with sources and literature.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<ul style="list-style-type: none"> - introduction to elements (events, processes) of Croatian early modern history that were not presented or were superficially and simplistically presented at earlier phases of their education - basic knowledge on relevant early modern Croatian and foreign historiography - introduction to various basic disciplinary approaches to the research of Croatian early modern history and their interpretative possibilities and limitations - through constant comparison, presentation of regional distinctions in Croatian early modern space, their causes and 		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>consequences, especially regarding the unification processes becoming ever more vivid towards the end of the 18th century</p> <ul style="list-style-type: none"> - development of methodology and critical approach to sources (seminar work) - development of the ability to conceptualize, interpret and develop hypotheses with regard to selected important phenomena, processes and source material - introductory knowledge on early modern material heritage and on the usage of this heritage in historical research 					
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Introduction: explanation of work obligations within the course and reasoning behind the selection of themes and conceptual framework of the lecture series 2. Introduction: overview of relevant local and foreign historiography 3. Space. Territories and jurisdictions from the 16th to the 18th centuries. Clash of three empires on Croatian early modern space. Establishment of the Habsburgs in the region, Ottoman expansion and limits of Venetian rule. 4. Institutional organization of Croatian-Slavonian Kingdom (king, royal institutions in Hungarian and Croatian-Slavonian Kingdom and in Austrian Hereditary Lands, Habsburg imperial authorities, local institutions in the Kingdom). 5. Ottoman institutional organization in early modern Croatia 6. Venetian institutional organization in Istria and Dalmatia and the institutional functioning of the Republic of Dubrovnik. 7. Military Border in the Croatian-Slavonian Kingdom by the 1630s. Development of military apparatus and its interrelation with civil political and territorial authorities. Ottoman <i>serhat</i> and Venetian military border. 8. Military Border from the 1630s until the end of the 18th century. Territorialization and militarization, reforms of the 18th century. 9. Social structures and social order I. Privileged groups of society (nobility, patricians, freemen, etc.). System of fiscal, political, seigniorial and symbolic rights and privileges 10. Social structures and social order I. Military and civil hierarchies. Taxation. Social revolts in early modern Croatia. 11. Demography of early modern Croatia between coast and continent. Migrations, ethnic concoction, acculturation, assimilation. 12. Material culture between the Dalmatian town and military fortress. 13. Written culture. Print-shops in Croatian historical lands and wider region. Cities, church institutions and noble courts and sources of literary activity. 14. Church hierarchies, and religious affiliations (Catholics, Orthodox, Muslims, Protestants, etc.) 15. Final explanation 					
<p>2.6. Format of instruction:</p>	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input checked="" type="checkbox"/> field work	<input checked="" type="checkbox"/> independent assignments <input checked="" type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	<p>2.7. 	Written exam	1	Project		(other)	
2.10. Grading and evaluating student work in class and at the final exam	Teacher will monitor and evaluate continuously the work of each student, both in lecture classes and in seminar classes. In order to ensure final signature and grade students should collect all required ECTS credits. The students are expected to attend lectures and seminars regularly and to participate actively in the work of a seminar class. Final evaluation is made on the basis of two evaluations conducted within the lecture part of the course and on the basis of the seminar work in the following ratio: two essays (20% for each essay), written exam (30%) and seminar (30%). Essays (up to three pages long) are due twice during the semester. Students select one of three chosen topics and have one week to submit an essay which tests their ability to identify, understand and present basic processes. Written exam test knowledge of basic facts and is conducted at the end of semester in several given exam terms. Questions are formed on the basis of lectures and required literature. Grade from a seminar work is based on following parameters: technical apparatus and citations 20%; participation in discussions, tables, graphs, visual material 20%; adequate coverage of topic and sufficient literature 30%; satisfactory conceptualization, argumentation and conclusion 30%.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Zrinka Blažević	1.6. Year of the study programme	2 nd
1.2. Name of the course	Early Modern European and World History	1.7. Credits (ECTS)	6/3
1.3. Associate teachers	Marko Šarić	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+30/0+0+0 (2+2/0+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	2
2. COURSE DESCRIPTION			
2.1. Course objectives	<p>This course will deal with key phenomena, structures and processes, which shaped early modern period of human history in the political, social and economic fields. Besides classical historiographical topics such as Humanism and Renaissance, Reformation, Great Discoveries and Enlightenment, in the focus of the course will be early modern material and symbolic practices, gender issues, phenomena of everyday life, transfer processes, processes of social discipline and confesionalization, alternative practices etc. Moreover, the main phenomena and processes, which marked early modern history of North and South American and African as well as Oriental civilizations of India, China and Japan will be systematically highlighted, with special attention to the phenomena of transnational exchanges, entanglings and transfers. The main objective of the course is representing basic phenomena, processes and concepts of early modern history according to the theoretical presumptions of <i>histoire croisée</i>, as well as adopting critical, analytical and interpretative skills indispensable for deepened understanding and conceptualization of basic phenomena of early modern history. The emphasis will be put on development of broad and multilayered perspectivization which enables recognition and interpretative analysis of complex and dynamic political, economic and cultural continuities and changes, interferences, exchanges and conflicts which mark early modern European and World history. The main objective of the seminar classes are developing abilities and skills of collecting, selecting, analysing and synthetizing facts and concepts, their understanding and evaluation, conceptualizations of research questions and their appropriate oral and written presentation. The special attention will be put on the analysis and interpretation of historical sources from the perspective of various theoretical approaches and paradigms of contemporary historical discipline.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

2.2. Course enrolment requirements and entry competences required for the course	Completion of the course “Medieval European and World history” and functional knowledge of one foreign language are necessary requirements for the course enrolment.				
2.2. Learning outcomes at the level of the programme to which the course contributes	Acquisition of basic knowledge of the subject and of the early modern historiographical research as well as development of critical and innovative thinking and multiperspective interpretation of early modern phenomena, processes and structures are learning outcomes of this course at the level of the programme.				
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Development of critical, analytical and interpretative skills from the comparative and transhistorical perspectives, development of the problem-solving skills as well as written and spoken language competencies are expected outcomes of this course.				
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ol style="list-style-type: none"> 1. "Early modern period" as historiographical concept and theories of protomodernity (Luhmann, Oestreich, Foucault, Bourdieu) 2. Towards the Global World – the Great Discoveries 3. Humanism and Renaissance 4. Early Modern Societies 5. Early Modern Economies 6. Early Modern State-building 7. History from "below"- everyday life, women, alternative practices 8. Challenges of Confessionalization – Reformation and Catholic Renewal 9. Russia between Autocracy and Europeization 10. Africa scraped between Europe and America 11. Early Modern Oriental Empires I – India 12. Early Modern Oriental Empires II – China 13. Early Modern Oriental Empires III - Japan 14. The Birth of America 15. The New Episteme – Enlightenment 				
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input checked="" type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input checked="" type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments: Lectures will be conjoined with <i>power – point</i> presentations available on the <i>Omega</i> system (system for distant learning of Faculty of Philosophy).		
	2.8. Student responsibilities Course „Early Modern European and World History“ consists of lectures and seminars. Students are expected to attend lectures continuously and actively participate in teaching process.				
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number	Class attendance	1	Research		Practical training

of ECTS credits is equal to the ECTS value of the course)	Tests		Oral exam		(other)	
	Written exam	2	Project		(other)	
2.10. Grading and evaluating student work in class and at the final exam	Students who have enrolled two subjects are obliged to write one essay (max. length of 5 pages) on pre-given topics concerning class schedules on the basis of recommended secondary literature or other relevant historiographical works. The essay grade influences the final mark in proportion of 40 %. Students are obliged to deliver the essay in the end of semester as prerequisite for the final written exam. In the end of the semester the final written exam is envisaged which influences the final mark in proportion of 60 %. Besides the examination of knowledge concerning class schedule, the written exam will test the knowledge of required literature. In the seminar classes it is planned combined type of learning in the form of introductory lectures, group discussions and individual presentations. Teacher will inspect and evaluate all types of individual student activities during the semester (presentations, primary sources analyses, bibliographies, database construction). That will provide elements of the final mark together with the seminar essay of 15 pages which influence the final mark of the course "Early Modern European and World History" in proportion of 50 %.

2. COUSE DESCRIPTION			
2.1. Course objectives	The course objectives are: acquiring knowledge from the field of general geomorphology, get acquired with properties, creation, evolution and recent dynamics of the Earth relief. Students will learn how to recognise main relief forms and understand their formation under main endogenous and exogenous processes.		
2.2. Course enrolment requirements and entry competences required for the course	Passed the examination - Geology		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Bachelors of geography operate with:</p> <p><u>Knowledge and understanding of:</u> Geographic terminology, definitions and theories. Applying of methodology in geography and current investigations in its field. Appropriate statistics and graphic techniques. Methods in cartography, interpretation of elements and contents of geographical maps. Fundamentals of structural and exogenous geomorphology. Geographical distribution and usage of water resources. Climate elements, factors and types. Elements and factors in physical geography and their interrelationship in geosystems on various spatial levels.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. The ability to interpret and discuss relevant and actual geographic problems and processes.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>The skills needed for evaluation, interpretation and synthesis of relevant information. The skills needed for presenting scientific contents and stances in written and oral form.</p> <p>Practical abilities and skills: Orientation in space with modern technologies and other skills needed in fieldwork. Mapping of geographic data, georeferencing. Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results.</p> <p>Generic abilities and skills: Problem solving, relating to qualitative and quantitative geographic information. Conducting literature research and use databases and other sources of information. Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Continuous professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> -Explaining the relief features of the Earth -Explaining the developments of ideas of the scientific discipline -Apply methodology of the structural and exogenous geomorphology in the explanation of relief formation -Define and compare planetary relief forms -Explaining the relief formation plate margins and plate interiors -On chosen examples explaining the influence of the exogenous processes on particular relief form -On chosen examples apply appropriate statistic and graphic methods and techniques, and interpret them -Applying knowledge in determining, defining and solving spatial problems of medium-level complexity.
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>COURSE CONTENT:</p> <ol style="list-style-type: none"> 1. Introduction 2. General properties of the Earth relief and factors of its development -Endogenic and exogenic factors. 3. The developments of ideas. 4. Endogenic processes and landforms – <ul style="list-style-type: none"> • Surface expressions of subsurface structures • Global morphology and tectonics (Landforms and tectonics of plate margins & Landforms and tectonics of plate interiors)

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<ul style="list-style-type: none"> • Landforms associated with igneous activity • Earthquakes and landforms. 5. Exogenic processes and landforms 6. Weathering processes and landforms 7. Slope processes and forms 8. Fluvial processes and landforms 9. Coastal processes and landforms 10. Glacial and periglacial processes and Landforms 11. Karst and fluviokrst processes and landforms 12. Aeolian processes and landforms 13. Biogenic processes and landforms 14. Anthropogenic landforms.				
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:		
2.8. Student responsibilities	Regular attendance to courses (80% practical) finished practical (6) and colloquium.				
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance		Research		Practical training
	Experimental work		Report		(other)
	Essay		Seminar essay		(other)
	Tests	1	Oral exam		(other)
	Written exam	5	Project		(other)
2.10. Grading and evaluating student work in class and at the final exam	The grade at the final exam is defined on regularity of attendance to courses and practical, on evaluation of the colloquium and written exam.				
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the library	Availability via other media
	Summerfield, M., 1991: <i>Global Geomorphology</i> , Longman, London, 537 pp.			5	Yes
	Ford, D., Williams, P., 2007: <i>Karst Hydrogeology and Geomorphology</i> , Chapman & Hall, 601 pp.			5	Yes
	Holden, J. (Ed.), 2012: <i>An Introduction to Physical Geography and the Environment</i> ,			5	Yes

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	Pearson, 876 pp.		
2.12. Optional literature (at the time of submission of study programme proposal)	Huggett, R., 2005: <i>Fundamentals of Geomorphology</i> , Routledge, 386 pp.		
2.13. Quality assurance methods that ensure the acquisition of exit competences	<p>Procedures set forth in the Regulations book and the Reference manual on quality management at the University of Zagreb, and at the Faculty of Science:</p> <ul style="list-style-type: none"> - student questionnaire at the University and Faculty level - self-evaluation of courses: modernisation and revision of aims and content of the course, the strategy of teaching and learning; evaluation of learning outcome by the analysis of student success based on the Student office and our own records - questionnaire after exit of the University: evaluation of integrated education programme - interview with tutors in schools-training facility where students perform methodical practice

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	According to decision of Geography Department Council	1.6. Year of the study programme	2 nd
1.2. Name of the course	Fieldwork in geography II	1.7. Credits (ECTS)	3
1.3. Associate teachers	According to decision of Geography Department Council	1.8. Type of instruction (number of hours L + S + E + e-learning)	60 hours/year
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The application of acquired knowledge and skills; recognition and demonstration of geographic phenomena and processes.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, skills and abilities: <u>Knowledge and understanding of:</u> Fundamental methodology in geography and history. Fundamentals in cartography and map elements. Elements and factors in physical geography and their interrelationship, geosystems of various spatial levels. Causality relations between the elements and factors of society and the natural environment. Contemporary geographical features of Croatia and Europe.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium complexity. The ability to interpret and discuss actual problems and processes relevant in geography and history. The skills needed for evaluation, interpretation and synthesis of relevant information. Skills in presenting scientific materials and arguments in writing and orally.</p> <p>Practical abilities and skills:</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Orientation in space with the help of modern technologies and skills needed for field work. Identifying and mapping of geographical and historical content. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the results. Creating models of field instruction for elementary and secondary schools.</p> <p>Generic abilities and skills: Conducting literature research and use databases and other sources of information. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement.</p>					
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> - Apply the acquired knowledge in the subject of the first and second year of study - Apply the methods and techniques of field research: locating, identifying, measuring, sketching and mapping, sampling and analysis of field samples, survey - Evaluate the results of fieldwork and research - Conceived plan and program of field work for students of primary and secondary schools and tasks to check the practical geographical skills 					
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>Content is partially variable depending on the area of scientific fieldwork. General derived from both study programs, with possible minor emphasis on programs subject of the year. It is performed once in field work week. Classes are held through demonstration lessons, possible exposure of students to advance a particular theme and through practical work of students that develop abilities and skills of application of field methods and techniques. Plan and program of field work in agreement with the students propose leaders of field work at the beginning of the summer semester, and is adopted by the Council of the Geographical Department.</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Iskra Iveljić, Mario Strecha	1.6. Year of the study programme	2 nd
1.2. Name of the course	Croatian history of the 19th century	1.7. Credits (ECTS)	6
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	30+30+0+0 (2+2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The objectives of the course is to acquaint students of the fundamental processes of Croatian history of the 19th century - modernization and national integration in a comparative perspective, both regionally (the context of Central and Southeastern Europe) and global (European and world history). Being listed complex processes make radical changes in all areas of social life, this course will provide insight into all relevant social events in the Croatian lands in the 19th century, and will include not only political, but also economic, social, cultural, educational the history. Participants will be encouraged to independent research and evaluation of sources and references (each participant will have its own process and present at least one source of Croatian History) to develop critical thinking and be able to design its own stance on important issues covered by the subject		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, skills and abilities: <u>Knowledge and understanding of:</u> Terminology, basic definitions and principal theories in geography and in history. Fundamental methodology in geography and history. The 19 Century history of the World, Europe and Croatia.</p> <p>Cognitive abilities and skills: The ability to interpret and discuss problems and processes relevant in geography and history. Ability to demonstrate the knowledge and understanding of essential facts, principles and theories in geography and history The skills needed for evaluation, interpretation and synthesis of relevant information.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials.</p> <p>Practical abilities and skills: Evaluation and utilization of written historical sources.</p> <p>Generic abilities and skills: Conducting literature research and use databases and other sources of information. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement.</p>		
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> - Interpretation of the basic processes of Croatian history of the 19th century, in a comparative perspective - Explain the changes in all areas of social life in the Croatian lands in the 19th century (political, economic, social, cultural and educational history) - Independently investigate the selected source and literature from the Croatian history of the 19th century - Present the results of research and evaluate odabrni source and literature from the Croatian history of the 19th century 		
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>Society in Civil Croatia – early modernization processes between 1790 and 1835. National Movement in Civil Croatia 1835th to 1848th / 49th Military Frontier of the late 18th century to 1848. The social development of Istria and Dalmatia in the first half of the 19th century. Movement in 1848 in the Croatian lands. Fragmentary modernization for neoabsolutism. The development of a modern civil society in Civil Croatia in the sixties and seventies of the 19th century. Croatian and Serbian national movement in Dalmatia. Autonomius. Social Development in Istria until the beginning of the revival. Croatian and Slovenian national movement in Istria. Military Frontier 1848th to 1881st Basic problems of the history of the Croatian people in Bosnia and Herzegovina 1878th-1918th Civil Croatia in time Khuen regime. Civil Croatia, Dalmatia and Istria in the period of crisis of dualism (1895th-1906th) Croatian country on the eve of the First World War. Croatian lands during the First World War.</p>		
<p>2.6. Format of instruction:</p>	<p>X lectures</p>	<p>X independent assignments</p>	<p>2.7. Comments:</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Dane Pejnović	1.6. Year of the study programme	2 nd
1.2. Name of the course	Rural Geography	1.7. Credits (ECTS)	5
1.3. Associate teachers	Aleksandar Lukić	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Acquiring knowledge on rural areas, the process of its transformation and the current problems of sustainable development. Understanding the structural and dynamic problems of rural areas, training for integrated planning of their development.		
2.2. Course enrolment requirements and entry competences required for the course	Passed an examination of population geography and rural geography course completed.		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, abilities and skills: <u>Knowledge and understanding of:</u> Terminology, basic definitions and principal theories in geography and in history. Fundamental methodology in geography and history. The role of population in processes and functional spatial organization. Urban and rural spatial systems, their structural and functional characteristics. Globalization and integration processes. Causality relations between the elements and factors of natural environment and society. Modern geography of Croatia and Europe. Concept of regional and sustainable development.</p> <p>Cognitive abilities and skills: The ability to interpret and discuss relevant and actual geographic problems and processes. The skills needed for evaluation, interpretation and synthesis of relevant information. The skills needed for presenting scientific contents and stances in written and oral form.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials.</p> <p>Practical abilities and skills: Mapping of geographic data, georeferencing. Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results.</p> <p>Generic abilities and skills: Problem solving, relating to qualitative and quantitative geographic information. Conducting literature research and use databases and other sources of information. Functioning effectively as an individual and as a team member. Continuous professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Knowledge and understanding of terminology, definitions and theories of rural geography. Knowledge and understanding of the structure, functions and processes in rural areas. Ability to distinguish rural discourse, models and allocation criteria of rural areas. Knowing and understanding the causes of the problems of sustainable development of rural areas. Ability to analyze spatial processes, their causes and consequences in rural areas. The ability to synthesize information and data on the problems of rural areas. Application of statistical and graphical methods in the analysis and presentation of the content of rural geography. Literature review on rural areas. Understanding the causes of the problems and possibilities of development of rural areas in the world, Europe and Croatia. Shape in courses for transfer in teaching geography in primary and secondary schools.</p>
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1 Introduction 2 Scientific bases of rural geography 3 Characteristics of rural areas 4 Development of rural areas 5 Rural areas in the modernization and global processes: the transformation factors 6 Rural areas in the modernization and global processes: forms of transformation 7 Population and demographic processes in rural areas 8 Socio-geographic features in rural areas 9 Lifestyles and identity of rural areas

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	10 Typology of rural areas 11 Problems of sustainable development of rural areas 12 Planning for sustainable development of rural areas 13 Problems and models of sustainable development of rural areas: case studies (World) 14 Problems and models of sustainable development of rural areas: case studies (Europe) 15 Problems and models of sustainable development of rural areas: case studies (Croatia)				
2.6. DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Stjepan Šterc	1.6. Year of the study programme	3 rd
1.2. Name of the course	Historical Geography of Croatia	1.7. Credits (ECTS)	5
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	15+30+0+0 (1+2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	<ul style="list-style-type: none"> • introduce students to the subject matter, methods and techniques of historical-geographical research • explain to students the specifics of the methodology in historical-geographical theoretical approach • achieve for students distinguish geographical, historical and historical-geographical objects of interest • to introduce students to the historical and geographical development of the Croatian space • especially for students to develop knowledge of the historical geographical aspects of the creation of Croatia early 1990s • enable students to independently lecturing approach to historical and geographical content, connections, processes and relationships • enable students to identify, define and transfer of historical-geographical legality • teach students identifying and explaining the repetition of history in space • familiarize students with setting up hypotheses and historical-geographical models and projections 		
2.2. Course enrolment requirements and entry competences required for the course	- Passed subject Demogeografija		
2.3. Learning outcomes at the level of the programme to which the course contributes	<u>Academic education:</u> Knowledge, abilities and skills: Reviewing, understanding and comprehension Historijskogeografskog theoretical and methodological concept and system Principles that govern the geographic space and time		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

Application of thought, graphic, cartographic, and other computational methods
Spatial-temporal processes, connections, relationships and models
Correlations natural base and social superstructure in the space-time continuum
General and regional concept of space organization throughout history
Functional and sustainable organization of space and time
Historijskogeografskih existing and planned features Croatian
Historical and geographical development of Croatian territory
Greek and Roman ancient society and its traces and influence in the Croatian region.
Elements necessary for the preparation, execution, evaluation and administration of teaching geography and history in primary and secondary schools.

Board abilities and skills
Spotting, definition, resolution and forecasting historical and spatial legality
Identification and resolution of spatial and historical disparity
Interpretation, discussing and explaining the relevant geographical and historical spatial processes, connections, relationships and models
The ability of the written and the oral hearing and clarifying scientific geographical and historical approach and content
Self-teaching using various forms of teaching, teaching methods and techniques and teaching materials and teaching strategies.

Practical ability and skills
Understanding the spatial logic
Mapping of geographical and historical content, processes, connections and relationships
Application of relevant computational and graphical methods under consideration and clarification
The use of cartographic methods and projections in reviewing, clarifying and transmission of geographic legality
Abilities and skills associated with the use of teaching aids and equipment

Operational capabilities and skills
Auto-search and selection of literature and data sources
Drafting proposals learning task
Efficient operation and access, independence and teamwork
The independence required for professional, methodical and professional development.
Effective communication with all participants in the system of science and education.

2.12. Optional literature (at the time of submission of study programme proposal)	<p><i>Političko-geografska i demografska pitanja Hrvatske</i>, 1991: SGD, Posebna izdanja, svezak 8, Zagreb.</p> <p>Šterc, S., Pokos, N., 1993: Demografski uzroci i posljedice rata protiv Hrvatske, <i>Društvena istraživanja 4-5</i>, 305-334.</p> <p>Goldstein, I., 2008: <i>Povijest 21, Hrvatska Povijest</i>, Jutarnji list, Zagreb.</p>		
2.13. Quality assurance methods that ensure the acquisition of exit competences	<p>The procedures set forth in the Rules and the Manual on quality management at the University of Zagreb and the Faculty of Science:</p> <ul style="list-style-type: none"> - University and college student survey - Self-evaluation of teaching: updating and revising objectives and subject content and teaching strategies and learning; evaluation of learning outcomes by analyzing the performance of students on the basis of data Student Administration Office and its own records - Exit polls: evaluation of an integrated study - Interview with a training facility where students perform methodical practice 		
2.14. Other (as the proposer wishes to add)	Teaching students study geography and history by a seminar works primarily on issues in the historical and geographical development of Croatian territory.		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Božena Vranješ Šoljan	1.6. Year of the study programme	3 rd
1.2. Name of the course	European and world history 1918th-1945th	1.7. Credits (ECTS)	6
1.3. Associate teachers	Ida Ograjšek Gorenjak Nikola Anušić	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+30+0+0 (2+2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Within the content of this course, students will learn about the socio-political events and processes in European and world history in the interwar period and during the Second World War. Special attention will be given to the discussion and interpretation of the historical and political concepts and terms that are essential for the understanding of the changes caused by the First World War. Certain historical phenomena that period will explain the regional and global access.		
2.2. Course enrolment requirements and entry competences required for the course	- Undergraduate courses in European and world history of the 19th century, the history of the 19th century Croatian and European Regions and Croatian History in the 19th century and entered the fifth semester.		
2.3. Learning outcomes at the level of the programme to which the course contributes	Independently with the sources and literature. Deepening and supplement the acquired knowledge, developing skills of critical thinking, responsible acceptance of reality (historical and contemporary) and the acquisition of general knowledge appropriate to higher education.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Identifying the main problems of the history of the interwar period; Understanding of historical events and processes that have marked the twentieth century; A critical evaluation of literature and sources; Understanding of the world we live in.		
2.5. Course content broken down in detail by weekly class schedule (syllabus)	Week 1: Lectures: Introduction to the most important determinants of European and world history of the 20th century. Periodization. View historiography. Seminar: Conventions seminar obligations.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Tvrtko Jakovina	1.6. Year of the study programme	3 rd
1.2. Name of the course	European and world history after the 1945th	1.7. Credits (ECTS)	6
1.3. Associate teachers	Hrvoje Klasić	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+30+0+0 (2+2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The objective of this course is to give an objective and complete picture of the most important processes and events of world politics, the development of society, economy and culture (from high art to popular / mass culture and sports) during the Cold War and the time of the global civilization, ending events ended in 2012 and opened the year 2013. "New Cold War History" will be the approach that I usually try to access the processing of most of the phenomena which we will discuss. This means confrontation of different views based on different archival materials. Students will identify the basic concepts and terminology, become familiar with the specifics of working with sources from the 20th		
2.2. Course enrolment requirements and entry competences required for the course	- passed examination in World History to 1945		
2.3. Learning outcomes at the level of the programme to which the course contributes	The course prepares students for critical valorization of the most dynamic historical periods, try to ensure the possibility of breaking the ideological barriers, interactivity and interdisciplinarity. Teachers will indicate the main theoretical approaches and trends in the history of the Cold War and the time that it is inherited.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Developing a critical, analytical and interpretative skills of students. Developed skills of oral and written expression. The seminar follows the theme of lectures, but in some of the phenomena that are to continue only mention goes deeper and further discusses them or placed in a different context. The seminar is a place where students are exposed and discussed, so in this segment of education should develop a sense of empathy, ability to listen the second and so on.		
2.5. Course content broken down in detail by weekly class schedule	1 WEEK Introduction to. Why we disagree about looking at the past? World War Two. What is the Cold War and when does it end? What

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Zrinka Blažević	1.6. Year of the study programme	3 rd
1.2. Name of the course	Contemporary historiography – theories and methods	1.7. Credits (ECTS)	3
1.3. Associate teachers	/	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+0+0+0 (2+0+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COURSE DESCRIPTION			
2.1. Course objectives	Since contemporary historical discipline is marked by plurality of diverse and often incompatible theoretical approaches and paradigms, in the focus of the course „Contemporary historiography – theories and methods“ will be a systematic overview of the most influential and most productive historiographical subdisciplines of the second part of the 20 th and beginning of the 21 st centuries. The goal of the course is acquaintance of main theoretical postulates, methodological principles and research orientations of the various fields and subdisciplines of the contemporary history.		
2.2. Course enrolment requirements and entry competences required for the course	Completion of the course “History of historiography” and functional knowledge of one foreign language are necessary requirements for the course enrolment.		
2.3. Learning outcomes at the level of the programme to which the course contributes	Capability of argued discussion and moderate evaluation of historiographical production, awareness of necessity of continuous rethinking of research results as well as of perspectivity of historiographical interpretation are learning outcomes at the level of the programme.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	The attention will be put on acquisition of categorial apparatus, comparative analysis, interpretation and critical evaluation of various historical subdisciplines. Accordingly, students will be informed not only of basic epistemological presumptions, problems and controversies of the contemporary historiography, but also their theoretical and methodological competencies, skills of conceptualization and reflection of the research and interpretative practice, as main prerequisites for writing of M.A. thesis, will be developed.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Mirjana Matijević Sokol	1.6. Year of the study programme	4 th
1.2. Name of the course	Introduction to Historical Auxiliary Sciences I.	1.7. Credits (ECTS)	3
1.3. Associate teachers	Tomislav Galović	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+0+0+0 (2+0+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1; 5%
2. COUSE DESCRIPTION			
2.1. Course objectives	Regarding the contents, the students will be acquainted with basic terms, definitions and a historical overview of the development of historical auxiliary sciences. As competencies, the student shall obtain insight into possibilities of interpretations of epigraphic, paleographic and diplomatic monuments, and they will become familiar with the most important literature and the methodology of scientific-expert analysis arising from an integral and interdisciplinary approach to the historical monuments. Classes encompass a survey of traditional auxiliary historical disciplines that enable work on the original medieval documents. Auxiliary Historical Sciences I consist of paleography, diplomatics, and egdotics. Paleography. Introduction to Latin paleography, Glagolitic paleography, Cyrillic paleography, and German Gothic paleography. Diplomatics. Definition and historical survey with special regard to Croatia. Egdotics - rules and procedures in publishing archival documents.		
2.2. Course enrolment requirements and entry competences required for the course	Not provided specific conditions. The student shall obtain insight into possibilities of interpretations of epigraphic, paleographic and diplomatic monuments, and they will become familiar with the most important literature and the methodology of scientific-expert analysis arising from an integral and interdisciplinary approach to the historical monuments.		
2.3. Learning outcomes at the level of the programme to which the course contributes	Acquaintance with basic skills for scientific research work, i.e. providing of insight into technical knowledge and procedures, especially regarding the work on original medieval documents in archives, libraries, and so on.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	The students will be acquainted with basic terms, definitions and a historical overview of the development of historical auxiliary sciences.		
2.5. Course content broken down in detail by weekly class schedule	1 Lecture: Course introduction. Curriculum. Literature 2 Lecture: Introduction to the epigraphy

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Dunja Modrić-Blivajs, Snježana Koren	1.6. Year of the study programme	4 th
1.2. Name of the course	Teaching Methodology of History I.	1.7. Credits (ECTS)	8
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	30+30+15+0 (2+2+1+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The basic objective of the course is theoretical and practical to train students of geography-history and history-geography (teaching stream) for teaching history in primary and secondary schools, linking theoretical knowledge about learning and teaching of history with teaching practice, as two key components of the development of teacher competencies. It is expected that students through lectures, seminars, practical teaching experience (observation of experienced teachers in the work and analysis of their watches) and individual work to acquire basic knowledge about learning and teaching of history in primary schools and in different types of secondary school (gymnasium and secondary vocational schools) and training for the preparation and teaching. Students are expected to professional commitment to this vocation, collaborative relationship with other students, course teacher and teacher-mentor and conscientiously and regularly carrying out obligations		
2.2. Course enrolment requirements and entry competences required for the course	Fulfilled all obligations during the previous semesters, especially in cases of Pedagogy, Psychology and Didactics who listen to the third year of study.		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>After passing the exam, students / will be able to / know:</p> <ul style="list-style-type: none"> -Applied basic knowledge acquired during the study of history in preparing and teaching in elementary and secondary schools, including the ability to describe and multi-layered interpretation of historical phenomena, processes and structures. -Applied methodological achievements of modern historiography in the learning and teaching of history. -Critical access to sources and literature and apply their knowledge when choosing and preparing teaching materials. -Applied knowledge of educational theories when designing various school activities and strategies of teaching and learning in the history classroom. -Independent select and use relevant literature for selected topics. 		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<ul style="list-style-type: none"> -Clearly and coherently present the results of research / learning in oral and written form. -Amount ratings and opinions and make a balanced assessment based on available facts. -Clearly and coherently present the results of research and / or teaching in oral and written form. -Demonstrated in their everyday work professional responsibility and respect for the ethics of the academic community.
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>After passing the exam, students / will be able to / know:</p> <ul style="list-style-type: none"> -Identify and explain fundamental questions of terminology, content and tasks of didactics of history. -Explain place and role of history teaching in the school system of the Republic of Croatian (organization of education, curricula, education policies and their impact on the teaching of history, etc.). -Are And state research of history that are focused on testing the curriculum and teaching methodology characteristics of history teaching. -Critical analyze, interpret and evaluate the objectives and content of modern history teaching (curricula in primary and secondary schools) in the wider European and global context, in the context of education policy, as well as in the context of contemporary historiography. Plan the lessons and make preparation for the lesson with all the necessary elements: set goals and outcomes of the lesson, clearly link them with appropriate activities for students, create a scenario and determine the stage of the lesson, choose the appropriate forms and methods of teaching and learning, choose appropriate media teaching, and competently use different teaching aids in the multimedia classroom history, including information and communication technology, etc. -Indicate and explain the purpose, methods and forms of monitoring, checking and assessment of students' knowledge in history, including the external assessments and prepare test with the tasks of closed and semi-open. -Aadequately respond to the individual needs of students, particularly students with special needs. -Explain forms and methods of professional training and personal development of history teachers and develop the need for permanent professional training and improvement of their own teaching. -Critical assess and evaluate their own work. -Develop a sense of human and stimulating relationship with students.
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>Week 1: Introductory information. What is the history of didactics / methodology of teaching history?</p> <p>Week 2: Teaching history in Croatia</p> <p>Week 3: Curricula history</p> <p>Week 4: Learning, development and teaching of history</p> <p>Week 5: Taxonomies of educational outcomes and their application in the teaching of history.</p> <p>Week 6: Motivation in history. Strategies metacognitive knowledge in history</p> <p>Week 7: Shaping the lesson of history</p> <p>Week 8: Strategies and methods of teaching and learning in history</p> <p>Week 9: Colloquium</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Week 10: The media teaching and learning in history teaching; work with textbook history Week 11: Assessment in history: basic concepts, rules on evaluation Week 12: Evaluating the teaching of history: objective type tasks, essay tasks, alternative assignments Week 13: Assessment in history: external assessments; competition. Week 14: The professional development of teachers of history Week 15: Repetition, determination and systematization of the material; Information on the successful achievement of commitments</p> <p>During the semester is in parallel with classes, place and teaching practice in primary and secondary schools. The exercises in this semester are intended as sensitization and introduction of male and female students in the practical aspects of the teaching profession. They are held in parallel with classes in college to help students / female students allow connection of theoretical knowledge with teaching practice in schools. Students / students are required to attend a total of 15 hours of practice: part of the schedule implemented hospitirajući in class mentor (5 hours in primary and 5 hours in high school). Demonstration classes preceded by an introductory talk, and after an hour followed by group analysis in which they analyze certain parts held hours by which implement the remaining five hours. The student's demonstration classes systematically monitored and evaluated descriptively tutor in consultation with the teacher teaching methods at university, and score for the exercise is part of the overall grade. Students / student during practice teaching observations made log and water daily teaching practice, which is part of their student portfolio.</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Vedran Prelogović	1.6. Year of the study programme	4 th
1.2. Name of the course	Geography of Europe	1.7. Credits (ECTS)	3
1.3. Associate teachers	-	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The main objective of the course is to enable students to understand regional complex (physical and social characteristics) of Europe. Special attention within this course is given to: writing of report, reading of selected texts related to the different aspects of regional geography of Europe, thematic discussions on different topics. Particular objectives of the course are: synthesis of contemporary theory and methodology of regional geography; emphasise and explain regional differences in Europe, that are induced by interaction of different economic, social, cultural and political factors on global, regional and local level and to emphasise importance of European integrations.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowledge and understanding of:</p> <p>Geographic terminology, definitions and theories.</p> <p>Applying of methodology in geography and current investigations in its field.</p> <p>Appropriate statistics and graphic techniques.</p> <p>Methods in cartography, interpretation of elements and contents of geographical maps.</p> <p>Elements and factors in physical geography and their interrelationship in geosystems on various spatial levels.</p> <p>The role of population in processes and functional spatial organization.</p> <p>Urban and rural spatial systems, their interrelationship and structural and functional characteristics.</p> <p>Systems and models in economic geography, their structure, dynamics and development factors on various spatial levels.</p> <p>Factors of development and characteristics of transportation modes, transportation networks, dynamics of transportation flows,</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>impacts of relationship of transport and other economic activities. Processes in political geography, with emphasis on globalisation and integration processes. Geographic aspects of socio-cultural processes. Causality relations between the elements and factors of natural environment and society. Concept of region and regionalisation. Modern geography of Croatia and Europe. Concept of regional and sustainable development.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. The ability to interpret and discuss relevant and actual geographic problems and processes. The skills needed for evaluation, interpretation and synthesis of relevant information. The skills needed for presenting scientific contents and stances in written and oral form. The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials.</p> <p>Practical abilities and skills: Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results.</p> <p>Generic abilities and skills: Problem solving, relating to qualitative and quantitative geographic information. Conducting literature research and use databases and other sources of information. Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Continuous professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> - explain physical and social geographic characteristics of Europe - explain causes and outcomes of regional differences in Europe - detach and to explain characteristics of main European regions - make a research on a selected topic and to present the results in a written and oral form - write a report on a selected topic

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Mirjana Matijević Sokol	1.6. Year of the study programme	4 th
1.2. Name of the course	Introduction to Historical Auxiliary Sciences II.	1.7. Credits (ECTS)	3
1.3. Associate teachers	Tomislav Galović	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+0+0+0 (2+0+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1; 5%
2. COUSE DESCRIPTION			
2.1. Course objectives	The students will be acquainted with basic terms, definitions and a historical overview of the development of Historical Auxiliary Sciences II. As competencies, the student shall obtain insight into possibilities of interpretations of historical sources, and they will become familiar with the most important literature and the methodology of scientific-expert analysis arising from an integral and interdisciplinary approach to the historical sources. Auxiliary Historical Sciences II consist of chronology, heraldry and sphragistics (sigillography), historical metrology, numismatics, genealogy, historical demography, historical geography and cartography, etc. Chronology. Basic elements of the date. Manner of dating. Holidays, eras, styles. Practical use of chronological tools (Easter tables and so on). Heraldry. Definition, basic terms and historical survey. Sphragistics (sigillography). Introduction with historical survey. Basic terms. Historical metrology. Basic terms on measures and weights. Numismatics. Historical survey. Genealogy. Introduction, basic terms and historical survey. Historical demography. Historical geography and cartography, etc.		
2.2. Course enrolment requirements and entry competences required for the course	Not provided specific conditions. The student shall obtain insight into possibilities of interpretations of historical sources, and they will become familiar with the most important literature and the methodology of scientific-expert analysis arising from an integral and interdisciplinary approach to the historical sources.		
2.3. Learning outcomes at the level of the programme to which the course contributes	Acquaintance with basic skills for scientific research work, i.e. providing of insight into technical knowledge and procedures, especially regarding the work on original medieval and early modern documents in archives, libraries, and so on.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	The students will be acquainted with basic terms, definitions and a historical overview of the development of Historical Auxiliary Sciences II. Development of general and specific competences, knowledge and skills: Introduction into the set of other skills of research work (chronology, heraldry, sphragistics, historical metrology, numismatics, genealogy, historical demography, historical geography and cartography, etc.), i.e. providing of insight into technical knowledge and procedures, especially

1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The basic objective of the course is theoretical and practical to train students of geography-history and history-geography (teaching stream) for teaching history in primary and secondary schools, linking theoretical knowledge about learning and teaching of history with teaching practice, as two key components of the development of teacher competencies. It is expected that students through lectures, seminars, practical teaching experience (observation of experienced teachers in the work and analysis of their watches) and individual work to acquire basic knowledge about learning and teaching of history in primary schools and in different types of secondary school (gymnasium and secondary vocational schools) and training for the preparation and teaching. They'll know accommodate the objectives and content of the teaching of history in the wider social context and understand that the way society treats the past affects the learning and teaching of history. Students are expected to professional commitment to this vocation, collaborative relationship with other students, course teacher and teacher-mentor and conscientiously and regularly carrying out obligations.		
2.2. Course enrolment requirements and entry competences required for the course	Fulfilled all obligations on the part of didactics of history I (including signature and evaluation).		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>After passing the exam, students / will be able to / know:</p> <ul style="list-style-type: none"> -Apply in preparing term papers, as well as teaching in primary and secondary schools, the results of research in historiography and methodology of teaching history, with clearly expressed awareness of time and personal conditionality of such interpretation. -Apply knowledge of educational theories when designing various school activities and strategies of teaching and learning in the history classroom. -Independently select and critically use the relevant references and sources for selected topics, as when making seminar and 		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>other papers, so when preparing training sessions in primary and secondary schools.</p> <ul style="list-style-type: none"> -Clearly and coherently present the results of research and / or teaching in oral and written form. -Arguments amount to evaluation and attitudes and make a balanced assessment based on available facts. -When creating works, identify, contextualize and conceptualize problems, post hypotheses and interpret the data. -Express in their daily work professional responsibility and respect for the ethics of the academic community
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>After passing the exam, students / will be able to / know:</p> <ul style="list-style-type: none"> -Apply the achievements of modern historiography in the learning and teaching of history and productively associate them with methodical theoretical knowledge and teaching practice. -Identify and explain the main research questions and topics of history teaching methodology that are focused on the history and politics of education, culture of memory and remembrance, interculturalism and intercultural approaches. -Critically analyze the relationship of history and identity politics, and the role of modern media in gaining awareness of the past. -Explain and critically evaluate the role of historical sources and historical concepts (chronology, causality, change and continuity, the meaning of past events, interpretation, multi-perspectivity) in constructing the historiographical narratives and explanations, and apply that knowledge in preparing teaching in primary and secondary schools. -Prepare teaching classes that indicate the reflection on the teaching of history beyond the mere reproduction of textbook content, or form such teaching activities at the center have the use of different types of historical sources, teaching about interpretations, concepts and controversies as a means of achieving higher levels of cognitive domain of Bloom's Taxonomy. -Assess students' knowledge and skills through essay tasks, create criteria for their evaluation, as well as for alternative assessment and evaluation of knowledge. -Develop plans for implementing the teaching of history in primary and secondary schools. -Recognize and appropriately respond to the individual needs of students, particularly students with special needs. -Critically assess and evaluate their own work and develop the need to permanently improve their own teaching. -Develop a sense of human and stimulating relationship with students.
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>Week 1: Introductory information. What are the basic historical concepts? Week 2: Historical concepts: chronological understanding Week 3: Historical concepts: causality Week 4: Historical concepts: change and continuity, the meaning of past events Week 5: Teaching Performances Week 6: Teaching sensitive and controversial issues Week 7: Working with historical sources: written sources Week 8: Working with historical sources: image sources Week 9: Working with historical sources: material sources. Museums and history teaching Week 10: Colloquium Week 11: extracurricular forms of learning and teaching of history. Field work Week 12: Project teaching history Week 13: Planning of history: making final plans - the annual plan</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Week 14: Planning of history: making final plans - thematic plan Week 15: Repetition, determination and systematization of the material; Information on the successful achievement of commitments</p> <p>During the semester is in parallel with classes, place and teaching practice in primary and secondary schools. They are held in parallel with classes in college to help students / female students allow connection of theoretical knowledge with teaching practice in schools. This semester begins self teaching. Students / students this part of the practices implemented in the same department in order to gain insight into the developmental aspects of the process of teaching and learning and to develop their sense of professional responsibility for students who teach. During this part of the practice, students / students showed that they are able to create the preparation for lessons and has been successfully implemented in the classroom. Students / students shall hospiritati to 5 hours mentor and independently held 5 hours, of which one sample clock. The remaining 5 watches implemented through individual instruction and consultation to faculty and teacher-mentor at school. The student's demonstration classes and holding classes systematically monitored and evaluated descriptively tutor in consultation with the teacher teaching methods at university, and score for the exercise is part of the overall grade. Students / student during practice produced water daily teaching practice and made preparations, which forms part of their student portfolio.</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Tajana Ljubin Golub	1.6. Year of the study programme	5 th
1.2. Name of the course	Fundamentals of Psychology of Education	1.7. Credits (ECTS)	8
1.3. Associate teachers	-	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+30+0+0 (2+2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Students will gain knowledge of the major theories of learning and their application in teaching students. You will acquire the basic knowledge to understand the personality and motivation of students and their potential application in the school environment. You will gain knowledge of individual differences and personality traits are important for academic success and customized school behavior and will know that the skills teachers need to encourage these qualities. Develop the skills to apply this knowledge in working with students for the purpose of adaptation approaches individuality of students and the purpose of education students healthy personality.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	The ability of continuous modernization and improvement of their professional practice psychological insights on the promotion of a healthy personality. The ability to adapt practices to individual personality traits students. The ability of counseling parents about the incentive and preventive measures for the development of personality.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Understanding the basic psychological approach in explaining learning. The ability to apply learning approach to teaching students. The ability to identify and to differentiate the basic personality traits of students. Understanding the necessity of adjustment of individuality and special needs students, and basic knowledge of ways to customize hyperactive students, dyslexic students and gifted students. Understanding the effects of self-concept, self-esteem, self-efficacy, delay and anxiety in school behavior and academic performance of students. The ability to observe a variety of student motivation and knowledge		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	about ways to encourage her. Understanding the role of stress for students and teachers in the school environment.					
2.5. Course content broken down in detail by weekly class schedule (syllabus)	Introduction to the Psychology of Education, subject and methods of this branch of psychology. Approaches to learning. Classical and instrumental conditioning and application in school. Cognitivist approach and implications for teaching. Socio-Cognitive approach to learning and implications for teaching. The role of intelligence in learning and behavior of students. Methods of teaching. Characteristics of Adolescents and adjustment to teaching. Characteristics of students with special needs and adjustments in teaching. Effect of basic personality dimensions and relevant personality traits (eg, disposal, anxiety, perfectionism) for student behavior and the implications for the role of teachers. Self-concept, self-esteem, self-efficacy and academic success. Motivational aspect of personality and influence on teachers' motivation. Pupils and teachers stress in the school environment.					
2.6. DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Snježana Koren, Dunja Modrić-Blivajs	1.6. Year of the study programme	5 th
1.2. Name of the course	History Teaching Practice	1.7. Credits (ECTS)	5
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	0+30+0+0 (0+2+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The purpose and goal of teaching practice is to gain experience teaching history at different levels and in different conditions of educational procesa. Temeljni objective of this course is to train students of geography-history and history-geography (teaching stream) for teaching history through the teaching practice in primary and secondary schools. It is expected that students through practical teaching experience (performance training sessions, observation of experienced teachers in the work, analysis watches mentors and other students) to develop the practical aspects of teaching competencies and to relate theoretical knowledge about learning and teaching of history acquired during the fourth year of studies with teaching practice. It is expected that students develop the capacity for self-assessment of teacher competence. Students are expected to professional responsibility and commitment to this vocation, collaborative relationship with the teacher-mentor, students, course teacher and other students and conscientiously and regularly carrying out obligations.		
2.2. Course enrolment requirements and entry competences required for the course	The condition for attending teaching practice all obligation to teaching and teaching practice in previous semesters.		
2.3. Learning outcomes at the level of the programme to which the course contributes	<u>After passing the exam, students / will be able to / know:</u> Apply in preparing training sessions in primary and secondary schools basic knowledge acquired during the study of history, as well as the methodological achievements of modern historiography. Apply in preparing training sessions fundamental methodological knowledge acquired during the study. Apply knowledge of educational theories when designing various school activities and strategies of teaching and learning in the history classroom. Independently select and critically use the relevant literature and resources to prepare training sessions in primary and secondary schools.		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Express in their daily work professional responsibility and respect for the ethics of the academic community.</p> <p><u>After completion of the practice, students / will be able to / know:</u> Independently conduct teaching in primary school and different schools. Prepare teaching classes that indicate the reflection on the teaching of history beyond the mere reproduction of textbook content, or form such teaching activities at the center have the use of different types of historical sources, teaching about interpretations, concepts and controversies as a means of achieving higher levels of cognitive domain of Bloom's Taxonomy. Own use (analyze, interpret, apply) curricula in preparing training sessions. Effective use of teaching aids which is equipped with modern classrooms history in a variety of teaching situations. Keep instructional documentation. Recognize and appropriately respond to the individual needs of students, particularly students with special needs. Develop a sense of human and stimulating relationship with students. Critically assess and evaluate their own work and the work of other students.</p>
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>In this semester takes place the bulk of teaching practice which is intended for 45 hours. Much of the practice takes place at school (30 hours), and a smaller part in the exercises, mentoring and teaching at the university and at school (15 hours). Students / students shall hospitirati in class mentors and other students a total of 15 hours and independently held 15 hours, of which one sample. Another 15 hours are realized through exercises and individual classes in college (10 hours) and agree with the teacher-mentor (5 hours). Compulsory minimum monthly report of the teachers teaching methods on their work and progress during practice and prepare sample clock in agreement with the teachers at the college. Students / students perform teaching bang in a different type of school compared to the previous semester (in one semester in the primary, and the other in high school) and thus acquire skills for teaching students of all ages. Teaching practice involves self-teaching, as well as observation of classes that are taught by teachers and other students in the school-gymnasium. Hospitirajući in class mentors and other students, students / students are trained to target and reflective observation of teaching, assessing the effects of different teaching strategies and raising awareness of certain aspects of teaching competence that particular need to develop the student's teaching systematically monitor and evaluate the mentor in consultation with the teacher teaching methods at university and teaching practice is evaluated separately, descriptive grade. Students / student will for one hour demonstration classes in class mentors spend an average of two hours, and for the preparation and analysis of an hour which independently performed spend an average of five hours. Staying in school also include the student's insight into the overall pedagogical school life (getting to know the school and pedagogical documentation, attend meetings, meeting different teaching assignments, working with children with special needs, acquainted with the historical groups, etc.). Students / student during practice water daily teaching practice, made preparations, which forms part of their student portfolio. Assembling portfolio includes collection of documents on developing their own teaching competence, which includes copies of preparation for teaching lessons with accompanying teaching materials, mentor student teaching quality assessment, self-assessment achieved teaching competence, daily practice and, as a dispensable part, a video self-instruction. Students /</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	students are also required to attend practice during individual consultations with mentor at the school and individual classes with teachers teaching methodology at the Faculty of Philosophy; to inform them about teaching lessons and lesson preparation.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Ružica Vuk	1.6. Year of the study programme	5 th
1.2. Name of the course	Geography Teaching Practice	1.7. Credits (ECTS)	6
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	0+0+90+0 (0+0+6+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	20
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The course aims are to train students for successful preparation, performing and analysis of geography lessons at school as well as prepare them for lifelong learning.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowledge and understanding fundamental methodology in education-related research. Knowledge and understanding legislation in the field of education. The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials. Teaching skills in various teaching forms, methods, techniques and strategies. Skills related to the usage of education materials and apparatus. Autonomous continuous professional improvement needed in professional development.</p>		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>After completing and passing the course, students will know and be able to:</p> <ul style="list-style-type: none"> - Applying the laws and regulations in the particular teacher and school situations - Will be able to distinguish between the structure and content of the geography lesson plan and syllabus in different types of schools in Croatia - Independently plan, program, develop, implement and evaluate educational work (regular classes, extra classes, remedial classes, elective classes, extracurricular activities) - Performing independently prepare lesson plan and syllabus for all grades that play the geography classes in primary and secondary schools - Autonomous writing independently prepare for all teaching units 		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<ul style="list-style-type: none"> - Formulate aims and objectives of teaching geography for all teaching units - Select and apply relevant teaching strategies, methods, techniques and procedures - Select and implement of effective forms of work in geography teaching - Select and use appropriate learning resources, create new teaching tools - Capability to modern educational technology including technology assisted spatial orientation - Find and select reliable databases and other information sources in the teaching geography - Develop and implement of multimedia content in the teaching geography - Capability of self-administered educational documentation - Apply the elements, forms, indicators and assessment criteria of student achievements - Develop and implement measurement instruments for evaluating student achievement - To provide a self-evaluation of the teaching process 					
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>Teaching practice takes place in selected schools under the expert guidance of teachers. Students will:</p> <ul style="list-style-type: none"> -get to know the school as an organization direct insight into its work -introduce legislation related to education in the Republic of Croatia -be introduced with pedagogical documentation -be introduced with lesson plan and syllabus for all grades that play the geography classes in primary and secondary schools -meet the organization of geography teaching in school, -be familiar with classroom where geography is taught, -attend classes teaching teachers - practitioners (mentors) -prepare, maintain and analyse several lessons -hold a public lesson, -write detailed lesson plans and a log-book in which they will write a short preparation for all teaching hours which were attended. 					
<p>2.6. Format of instruction:</p>	<input type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input checked="" type="checkbox"/> work with mentor <input type="checkbox"/> (other)	<p>2.7. Comments:</p>			
<p>2.8. Student responsibilities</p>	<p>Students are required to perform methodical practice, write a log book of practice, independently held several lessons of instructions, held public lesson and write detailed preparation for each lesson.</p>					
<p>2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS</p>	<p>Class attendance</p>		<p>Research</p>		<p>Practical training</p>	<p>3</p>
	<p>Experimental work</p>		<p>Report</p>		<p>Log book</p>	<p>1</p>
	<p>Essay</p>		<p>Seminar essay</p>		<p>Lesson plans</p>	<p>2</p>
	<p>Tests</p>		<p>Oral exam</p>		<p>(other)</p>	

DETAILED PROPOSAL OF THE STUDY PROGRAMME

value of the course)	Written exam	Project	(other)	
2.10. Grading and evaluating student work in class and at the final exam	Grade is formed on the basis of mentor mark (an activity in class, regular attendance, held an independent teaching hours) (40 %), mark of a log book of practice and lesson plans (5 %), rates of each written preparation held independent teaching hours (15 %) and the mark of public lesson (40 %).

DETAILED PROPOSAL OF THE STUDY PROGRAMME

GEOGRAPHICAL ELECTIVE COURSES

1. GENERAL INFORMATION			
1.1. Course teacher	Dražen Kurtanjek	1.6. Year of the study programme	1 st and 2 nd
1.2. Name of the course	Mineralogy and Petrology	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	30+0+15+0 (2+0+1+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Learn the basic concepts and principles of mineralogy and petrology. Obtaining information about origin, properties and use of minerals and rocks. Developing skills (on the field and in the laboratory) of determination of minerals and rocks. Developing critical evaluation of mineralogy and petrology and its role in science and overall education.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowledge and understanding of: Principal theories and teaching methodology of mineralogy and petrology</p> <p>Cognitive, practical and generic abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. Ability to demonstrate the knowledge and understanding of essential facts, principles and theories in mineralogy and petrology The ability to interpret and discuss actual geologic-related problems and processes. The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials. Modern technology assisted spatial orientation and other skills needed in fieldwork class. Skills related to the preparation, performance and evaluation of fieldwork class. Recognition and utilization of information in the field of mineralogy and petrology. Conducting literature research and use databases and other information sources. Functioning effectively as an individual and as a team member.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	Autonomous continuous professional improvement needed in professional development.				
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Students should be capable to: explain and describe internal order in crystals as well as crystal morphology; define and determine chemical and physical properties of minerals (identify and systematize); distinguish the main rock types and varieties inside of each group and explain their origin.				
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ul style="list-style-type: none"> - Introduction (opening remarks, organization of teaching, course program); definition of mineral and mineralogy; history of mineralogy - Crystallography – internal order in crystals, crystal lattice, Bravais lattices - Atoms, ions, molecules as building elements of crystal lattice, bonding forces in crystals, crystallization - Crystal structure; coordination number; coordination polyhedron; atomic and ionic size - Crystal habit; crystal systems; symmetry elements; crystal classes - Chemical properties of minerals (composition, isomorphism, polymorphism); mineraloids - Physical properties of minerals (hardness, tenacity, specific gravity, cleavage, fracture, color, luster, thermal, electrical and magnetic properties) - Systematization of minerals - Igneous rocks – introduction; Earths interior; origin and composition of magma; plate tectonics - Texture and structure of igneous rocks; stages of crystallization of magma, composition and classification of igneous rocks - Sedimentary rocks – introduction; sedimentary cycle (weathering; erosion, transportation, deposition, lithification) - Texture and structure of sedimentary rocks; composition and classification of sedimentary rocks (clastic sediments, biogenic and organic sediments, chemical sediments, volcanoclastic sediments, residual sediments) - Metamorphic rocks – introduction; factors controlling the metamorphic processes (pressure, temperature, chemically active fluids); types of metamorphism - Composition and classification of metamorphic rocks; metamorphic facies - Identification methods of minerals and rocks

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Danijel Orešić	1.6. Year of the study programme	1 st and 2 nd
1.2. Name of the course	Marine Geography	1.7. Credits (ECTS)	3
1.3. Associate teachers	-	1.8. Type of instruction (number of hours L + S + E + e-learning)	45+0+0+0 (3+0+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Acquiring fundamental knowledge about world ocean and its geographic significance. In physical geography emphasis is on main oceanographic properties and their influence in global and regional geography. In human geography the goal is to understand its significance in historic geography as well as in modern world transportation, economics and geopolitics.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, abilities and skills: <u>Knowledge and understanding of:</u> Geographic terminology, definitions and theories. Geographical distribution and usage of water resources. Elements and factors in physical geography and their interrelationship in geosystems on various spatial levels. Factors of development and characteristics of transportation modes, transportation networks, dynamics of transportation flows, impacts of relationship of transport and other economic activities. Processes in political geography, with emphasis on globalisation and integration processes. Causality relations between the elements and factors of natural environment and society.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. The ability to interpret and discuss relevant and actual geographic problems and processes. The skills needed for evaluation, interpretation and synthesis of relevant information.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>The skills needed for presenting scientific contents and stances in written and oral form.</p> <p>Practical abilities and skills: Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results.</p> <p>Generic abilities and skills: Problem solving, relating to qualitative and quantitative geographic information. Conducting literature research and use databases and other sources of information. Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Continuous professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Knowing the geographic distribution of oceans and seas. Understanding ocean properties and their geoecologic role. Understanding eustatic and regional sea level changes. Knowing surface and deep-sea ocean current systems. Understanding geographic influences of sea currents. Understanding the genesis and influences of sea waves and tides. Understanding primary organic production in world ocean. Knowing maritime political and economic regimes; elements of international maritime law. Skills in using charts. Ability to discuss oceans historic geography role and modern socioeconomic role. Ability to discuss the need of ocean conservation. Conducting literature research in the field of marine geography.</p>
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1 Marine geography and marine sciences. 2 Geographic distribution of oceans and seas. Sea level changes. 3 Geomorphology of ocean basins. 4 Chemical composition of sea water, geographic and internal distribution of salinity. 5 Geographic and internal distribution of sea water temperature. Relation between temperature, salinity and density of the sea water. Sea ice. 6 Atmosphere – ocean interactions. Horizontal oceanic circulations. 7 Vertical oceanic circulation.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>8 ENSO. 9 Waves. 10 Tides. 11 Matter and energy ocean circulation. Marine organisms' distribution. Primary organic production in oceans. 12 Physical geography properties of coasts, types of coasts, estuaries and deltas. 13 Oceans and seas in socioeconomic development. Fishing and mariculture. Off-shore ore extraction. Energy from the ocean. 14 Oceans in world trading. Litoralization. 15 Elements of international maritime law.</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Laura Šakaja	1.6. Year of the study programme	1 st and 2 nd
1.2. Name of the course	Cultural Geography	1.7. Credits (ECTS)	3
1.3. Associate teachers	Lana Slavuj Borčić	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The aim of the course is to provide essential knowledge of the basics of cultural geography, its area of interest and its key methods. Students are expected to adopt a critical approach to study topics and to develop the ability to analyze the role of space in shaping different cultural contexts. Students will learn the methodology of cultural geography through the practical work on seminar essay. They will be expected to present seminar essay in written and oral form and to demonstrate the ability to reconstruct the social, political and cultural processes embedded in cultural landscapes.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowledge and understanding of:</p> <ul style="list-style-type: none"> - geographic terminology, definitions, key theories and methods -causality relations between the elements and factors of natural environment and society in the formation of cultural landscapes - process of cultural globalisation and its influence on the transformation of cultural landscape <p>Cognitive, practical and generic abilities and skills:</p> <ul style="list-style-type: none"> - applying knowledge in determining, defining and solving spatial problems of medium-level complexity. -the ability to interpret and discuss relevant and actual geographic problems and processes - the skills needed for presentation of scientific contents and stances in written and oral form - the skills needed for fieldwork. -conducting literature research and use databases and other sources of information 		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	- applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results.			
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>Knowing and understanding the subject of cultural geography and its place in the structure of social sciences; Knowing and understanding linguistic and religious map of the world; Ability to analyze ethnic and religious cultural landscapes; Ability to identify and explain different discourses, especially in the case of the terms "race" and "nation"; Ability to analyze the local effects of cultural globalization; Ability to explain the role of politics and ideology in shaping the cultural landscape; Ability to understand and interpret the relational nature of identity and the role of the Other in shaping selfhood; Ability to understand and evaluate the development potential of culture.</p>			
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ol style="list-style-type: none"> 1. The subject of cultural geography and its place in the structure of social sciences. Key concepts in cultural geography. 2. Research methods in cultural geography. 3. Linguistic map of the world. Diffusion of languages. Croatian dialect map. 4. Universal religions: distribution, sacred places and symbolic landscapes. 5. Ethnic religions: distribution, sacred places and symbolic landscapes. 6. Notion of "race". Race map of the world. History of racism and its contemporary expressions. 7. Cultural globalization and its impact. Concept of nation and national identity. "Deterritorialization" of culture. Migrant communities. 8. Ethnic regions. Cultural diffusion and ethnicity. Ethnic neighborhoods and segregation. Ethnic landscapes. Dual identities. 9. Landscape as a system of social reproduction. Social inequality and space. Landscapes and social exclusion. 10. Landscape symbolism. Value systems and landscapes. Landscape, politics and ideology. Post-socialism and urban landscape transformation. 11. Spatial perception and mental maps. Vernacular cultural regions. Imaginative geographies. Mental map of Europe in the Croatian perspective. 12. Geography of food. Food and ethnic communities. Globalization and food. 13. Landscape representations in literature, film and painting. Geography and music. 14. Cultures of production. Production and the way of life. 15. Cultures of consumption. Places of consumption.

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Anita Filipčić	1.6. Year of the study programme	2 nd
1.2. Name of the course	Regional Climatology	1.7. Credits (ECTS)	3
1.3. Associate teachers	Mladen Maradin	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The main learning objective is to study the causes and effects of climatic differences between different latitude, the climate characteristic of Croatia, as well as climate characteristic of the continents. Thus the students can reveal the consequences of climatic differences. It is important to take into consideration the processes responsible for the present climate and actual processes responsible for future climate.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowing and understanding of:</p> <ul style="list-style-type: none"> -regional climatic features -climate influence on other geographical elements -regional geography of Europe and world regional geography. <p>Cognitive, practical and generic abilities and skills</p> <p>Applying knowledge in determining, defining and solving spatial problems of medium-level complexity.</p> <p>Performing of knowledge and understanding of crucial facts, terms, principles and theories related to regional climatology.</p> <p>Explanation and discussing of geographic climatological features and processes relevant related to continents.</p> <p>Implementation of scientific content considered regional climatology into the educational content, preparing and appropriate presentation of educational content.</p> <p>Skills needed for evaluation, explanation and synthesis of information's and climatic data.</p> <p>Skills needed for performing of climatology field work.</p> <p>Organization, realization and evaluation of the field work at the nearest meteorological station.</p> <p>Recognition and use of geographic information's.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	Searching of references and data related to regional climatology. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement needed in professional development.				
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Knowing, understanding and independent explanation the causes of regional climatic features. Knowing, understanding and independent explanation of geographical consequences of climatic features. Knowing, understanding and independent explanation of climatic features of each continent. Knowing, understanding and independent explanation climatic features in the low, middle and high latitude. Knowing, understanding and independent explanation climatic characteristic of Croatia Knowing, understanding and independent explanation of recent climatic change.				
2.5. Course content broken down in detail by weekly class schedule (syllabus)	1. The regional climate: microclimate, local climate, mesoclimate, macroclimate. 2. The empiric and genetic classifications. Koepopen's and Thornthwait's classification. 3. Tropical climates 4. Deforestation and desertification 5. The mid-latitude climates 6. Polar climates 7. The climates of the continents. The climate of Europe 8. The climate of Asia 9. The climate of North America 10. The climate of South America 11. The climate of Africa 12. The climate of Australia 13. The climate of Croatia 14. The global influences and the local changes 15. The recent climate change

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Dražen Njegač	1.6. Year of the study programme	2 nd
1.2. Name of the course	Urban systems of the world	1.7. Credits (ECTS)	3
1.3. Associate teachers	-	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Adoption of the general knowledge of the urban systems of the world, their differences and development. Students have to know the methods for the analysis and the characteristics of the world's urban systems, the development phases and regional specifics of the urban systems as well as the cultural-genetic characteristics of the cities, the development of the urban systems under influence of the European integration and the global urban system. They have to be able to apply the theoretic models and use the statistic and cartographic methods for analyzing spatial, hierarchical and temporal specifics of the urban systems of the world.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, abilities and skills: Knowledge and understanding of: Urban systems, their structural and functional characteristics. Causality relations between the elements and factors of natural environment and society. Applying of methodology in geography and current investigations in its field.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. The ability to interpret and discuss relevant and actual urban-geographic problems and processes. The skills needed for evaluation, interpretation and synthesis of relevant information. The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials.</p> <p>Practical abilities and skills:</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Skills needed in fieldwork class. Evaluation and utilization of written historical sources. Recognition and utilization of geographic information. Generic abilities and skills: Problem solving, relating to qualitative and quantitative urban-geographic information. Conducting literature research and use databases and other sources of information. Autonomous continuous professional improvement needed in professional development. Skills related to the communication process in education.</p>	
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>-to define the notion and explain the characteristics of the urban systems of the world -to apply the methods for the analysis of the urban systems -to identify the phases of the urban systems development on the local, national and global levels -to explain and compare regional specifics of the development of the urban systems and the cultural-genetic characteristics of the cities -to transfer scientific information about urban systems into education process</p>	
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Notion and characteristics of the urban systems. 2. Methods for the analysis of the urban systems. 3. Phases of the urban systems development. 4. Regional specifics of the development of the urban systems. 5. Cultural-genetic characteristics of the cities. 6. Development of the urban systems of Europe Part 1. 7. Development of the urban systems of Europe Part 2. 8. Development of the urban systems of Orient. 9. Development of the urban systems of Africa. 10. Development of the urban systems of Asia. 11. Development of the urban systems of Latin America. 12. Development of the urban systems of Angloamerica and Australia. 13. Development of the urban systems of Croatia. 14. Urban system and European integration. 15. Global urban system. 	
<p>2.6. Format of instruction:</p>	<p>x lectures x seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work</p>	<p><input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory x work with mentor <input type="checkbox"/> (other)</p>
		<p>2.7. Comments:</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

2.8. Student responsibilities	Regular class attendance, oral presentation of written essay.					
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	0,5	Research		Practical training	
	Experimental work		Report		(other)	
	Essay		Seminar essay	0,5	(other)	
	Tests		Oral exam	1	(other)	
	Written exam	1	Project		(other)	
2.10. Grading and evaluating student work in class and at the final exam	The final grade is based on the written exam, oral exam and written essay. Each component has to be evaluated positively.					
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the library	Availability via other media	
	Vresk, M., 2002: <i>Razvoj urbanih sistema u svijetu – geografski pregled</i> , drugo prerađeno izdanje, Školska knjiga, Zagreb.			10	Yes

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Martina Jakovčić	1.6. Year of the study programme	2 nd
1.2. Name of the course	Transportation Geography	1.7. Credits (ECTS)	3
1.3. Associate teachers	Slaven Gašparović	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The general aim is to gain knowledge about transportation geography as scientific discipline and explanation of development, types and functioning of transportation and its impact on spatial and structural changes. Students will began knowledge about main methods of transportation research, development of certain types of transportation its impact on economic developments and other social aspects o everyday life (migration, free time...)- Special attention will be given to study of transportation systems of Croatia and its integration into European transportation system and the role on contemporary globalization problems.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	Knowing and understanding of factors of development, characteristic of specific transportation modes, transportation networks, dynamic of transportation flows, interconnection between transportation and economic activities. Applying knowledge in determining, defining and solving spatial problems of medium-level complexity in transport organization Ability to explain and discuss relevant and actual transportation geographic problems and processes. Ability to conduct basic analysis of transportation networks at specific areas. Mapping of geographic contents. Continuous professional development. Conducting literature research and use databases and other sources of information.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	To know objects and goals and methodology of research in transportation geography Explain division, development and characteristics of certain modes of transportation, impact of transportation on spatial organization, importance of transportation on contemporary world and process off globalization. Explain factors of development, basic characteristics of transportation networks and transportation flows in Croatia and to explain them with chosen examples.		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Evaluate position and role of Croatia in paneuropean transportation corridors. Use relevant methods and approaches of transportation geography in collecting, processing and interpretation of spatial data. Apply knowledge in determination and solving of spatial problems of medium level complexity.</p>																																	
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Transportation geography, objects, and goals of research 2. Methods of transportation – geographic research part I 3. Methods of transportation – geographic research part II 4. Methods of transportation – geographic research part III 5. Division of transportation, development and characteristics of certain modes of transportation part I 6. Division of transportation, development and characteristics of certain modes of transportation part II 7. Division of transportation, development and characteristics of certain modes of transportation part III 8. Division of transportation, development and characteristics of certain modes of transportation part IV 9. Factors of development of transportation systems part I 10. Factors of development of transportation systems part II 11. Impact of transportation connectivity and accessibility on the process of transportation marginalization 12. Role of transportation in contemporary world and it impact on process of globalization 13. Transportation system of Croatia – factors of development, characteristics of transportation networks and flows part I 14. Transportation system of Croatia – factors of development, characteristics of transportation networks and flows part II 15. Croatia and paneuropean transportation corridors. 																																	
<p>2.6. DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Dane Pejnović	1.6. Year of the study programme	3 rd and 5 th
1.2. Name of the course	Geography of Southeast Europe	1.7. Credits (ECTS)	3
1.3. Associate teachers	-	1.8. Type of instruction (number of hours L + S + E + e-learning)	45+0+0+0 (3+0+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Acquiring knowledge, skills and attitudes about the geographical reality of Southeast Europe		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, skills and abilities: <u>Knowledge and understanding:</u> Geographic terminology, definitions and theories. Applying of methodology in geography and current investigations in its field. Appropriate statistics and graphic techniques. Methods in cartography, interpretation of elements and contents of geographical maps. Elements and factors in physical geography and their interrelationship in geosystems on various spatial levels. The role of population in processes and functional spatial organization. Urban and rural spatial systems, their interrelationship and structural and functional characteristics. Systems and models in economic geography: structure, dynamics and development factors on various spatial levels. Factors of development and characteristics of transportation modes, transportation networks, dynamics of transportation flows, impacts of relationship of transport and other economic activities. Processes in political geography, with emphasis on globalisation and integration processes. Geographic aspects of socio-cultural processes. Causality relations between the elements and factors of natural environment and society. Concept of region and regionalisation. Modern geography of Croatia and Europe. Concept of regional and sustainable development.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Cognitive, practical and generic skills and abilities: Application of knowledge in identifying, defining and solving spatial problems medium complexity. Displaying the knowledge and understanding of essential facts and concepts of regional geography of Southeast Europe. Interpretation and discussion of current relevant geographic phenomena and processes in South Eastern Europe. Transfer of scientific content of the South-East Europe in the teaching of geography in primary and secondary schools. Skills in the evaluation, interpretation and synthesis of information and data from regional geography. Recognition and use of geographic information about Southeastern Europe. The literature search and sources of regional geography of Southeast Europe. Work effectively, independently and in a team. Individual work required for professional advancement and professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Ability to:</p> <ul style="list-style-type: none"> - Explain the concepts, approaches and methods of regional geography - Explain the particularities of Southeast Europe in the regional structure of Europe - Explain the heterogeneous spatial structure of Southeast Europe - Explain the causes of delayed state-formation of the Region in the European context - Explain the differences in the structure of population, level of development and spatial organization between states of the Region - Explain the relationships and processes among the peoples and countries of Southeast Europe - Affirm the forms of cooperation that contribute to the European integration process - Affirm an active role of Croatia as a linking factor of regional cooperation in Southeast Europe - Evaluate the educational potential of the course contents
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Introduction <ul style="list-style-type: none"> - Scientific basis of regional geography - Explanation of basic conceptual categories (Southeast Europe, the Balkans, the Western Balkans) - The geographical location Regions 2. Basic natural and geographical features <ul style="list-style-type: none"> - Macro relief structure - Climate-ecological characteristics - Hydrographic features 3 historical and geographical development and political genesis South East Europe <ul style="list-style-type: none"> - Basics of historical and geographical development - Political genesis and processes of territorialization 4 Contemporary socio-geographic characteristics and problems of Southeast Europe

DETAILED PROPOSAL OF THE STUDY PROGRAMME

- The structure of population and demographic characteristics
- Mosaic cultural and geographical structure (Ethnic and religious composition)
- Economic and social structure
- Critical points
- 5 Fundamentals of regional isolation and the regional structure of South East Europe
 - Basics of regional isolation
 - Critical analysis of "regions" with respect to the criteria of the geographical regionalization (physiognomic, traditional, cultural and geographic, political and geographic region)
 - Modern regional structure of Southeastern Europe (Eastern, Southern and Western Balkans)
- 6 Member of the eastern Balkans (1) (Romania)
 - The basic geographic features (geographic location, population structure, resource base and economy, spatial and functional organization, specific spatial development issues)
- 7 The eastern Balkans (2) (Bulgaria)
 - The basic geographic features (geographic location, population structure, resource base and economy, spatial and functional organization, specific spatial development issues)
- 8 Member of the southern Balkans (Greece)
 - The basic geographic features (geographic location, population structure, resource base and economy, spatial and functional organization, specific spatial development issues)
- 9 Member of the Western Balkans (1) (Serbia)
 - The basic geographic features (geographic location, population structure, resource base and economy, spatial and functional organization, specific spatial development issues)
- 10 Member of the Western Balkans (2) (Albania)
 - The basic geographic features (geographic location, population structure, resource base and economy, spatial and functional organization, specific spatial development issues)
- 11 Member of the Western Balkans (3) (Kosovo)
 - The basic geographic features (geographic location, population structure, resource base and economy, spatial and functional organization, specific spatial development issues)
- 12 Member of the Western Balkans (4) (Macedonia)
 - The basic geographic features (geographic location, population structure, resource base and economy, spatial and functional organization, specific spatial development issues)
- 13 States of the Western Balkans (5) (Montenegro)
 - The basic geographic features (geographic location, population structure, resource base and economy, spatial and functional organization, specific spatial development issues)

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>14 States of the Western Balkans (6) (Bosnia and Herzegovina) - The basic geographical features (geographical location, historical and geographical base development and political genesis, impact War of the 1990s the population structure, spatial and functional organization and development of the country, the problems unfinished political genesis)</p> <p>15 Croatian and South East Europe - Integration-disintegration processes in the region - Interactions and issues in relations with neighboring countries - Bilateral international cooperation: state and promising opportunities</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Dražen Njegač	1.6. Year of the study programme	3 rd and 5 th
1.2. Name of the course	Geography of East Asia	1.7. Credits (ECTS)	3
1.3. Associate teachers	-	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Knowledge of East Asia as one of the most prosperous areas of the world. Students have to be able to know the meaning and specifics of the East Asian countries in regional and global context and, concerning the trends, to envision their future development.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Professional knowledge, abilities and skills: Knowledge and understanding of: Modern geography and regional specifics of East Asia. Causality relations between the elements and factors of natural environment and societies of East Asia. Political geography of East Asia, with emphasis on globalisation and integration processes. Applying of methodology in geography and current investigations.</p> <p>Cognitive abilities and skills: The ability to interpret and discuss relevant and actual geographic problems and processes in East Asia. The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials. The skills needed for evaluation, interpretation and synthesis of relevant information.</p> <p>Practical abilities and skills: Recognition and utilization of geographic information.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results. Generic abilities and skills: Conducting literature research and use databases and other information sources. Autonomous continuous professional improvement needed in professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> -to compare the physical-geographic and sociogeographic elements and factors and their causality relations on the continental, regional and country levels -to explain the population distribution, to analyse the settlement characteristics and economic activities in East Asia in comparison with the Asian continent -to differentiate urban and rural systems, their structural and functional characteristics -to explain the economical-geographic systems and models, development factors, dynamics and structures of the regional and national economies -to apply the common geographic knowledge to interpret and discuss relevant and actual geographic problems and processes in East Asia -to apply appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results. -to develop the skills needed for presenting scientific contents and stances in written and oral form. -to conduct literature research and use databases and other sources of information. -to develop the skills needed for evaluation, interpretation and synthesis of relevant information. -to transfer scientific information about East Asia into education process
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Physical-geographic characteristics of East Asia. 2. Population of East Asia. 3. Historical-geographic development. 4. Transport-geographic characteristics. 5. Economic geography of East Asia. 6. Modern processes in East Asia. 7. Regions of East Asia. 8. China – part 1. 9. China – part 2. 10. Pacific Rim. 11. Japan. 12. Korean peninsula (North and South Korea). 13. Taiwan.

2.13. Quality assurance methods that ensure the acquisition of exit competences	In accordance with the Rule book and Manual of quality management at the University of Zagreb and the Faculty of Science.
2.14. Other (as the proposer wishes to add)	

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Laura Šakaja	1.6. Year of the study programme	3 rd and 5 th
1.2. Name of the course	Geography of Anglo-America	1.7. Credits (ECTS)	3
1.3. Associate teachers	Lana Slavuj Borčić	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Acquiring knowledge of spatial aspects of recent social, economic and political processes in the United States and Canada. Seminar, that will be based on the statistical analysis of data on population, cities, economy and trade of the United States and Canada, will enable students to apply knowledge gained during study process and to map geographic data. It will also provide insight into North American contemporary data sources and databases.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	<p><u>Professional knowledge, abilities and skills:</u></p> <p><i>Knowledge and understanding of:</i></p> <p>Elements and factors in physical geography and their interrelationship on various spatial levels. Factors and consequences of the spatial distribution of population, settlements and economic activities in North America Urban and rural spatial systems in North America, their interrelationship and structural and functional characteristics Systems and models in economic geography, their structure, dynamics and development factors on various spatial levels.</p> <p><u>Cognitive, practical and generic abilities and skills:</u></p> <p>Applying knowledge in determining, defining and solving spatial problems of medium-level complexity.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	Ability to present knowledge and understanding of concept of regional geography Ability to transfer scientific knowledge on North America into education contents The skills needed for evaluation, interpretation and synthesis of relevant information Conducting literature research and use databases and other sources of information. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results.				
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Knowing and understanding the specificity of territorial development the U.S. and Canada Ability to assess the role of various factors of the economic growth and social progress in the United States and Canada Ability to detect and analyse push and pull factors of international migration flows Ability to explain the factors of economic development of the United States and Canada Knowing and understanding of the US state structure and electoral system Knowing and understanding of the origin and essence of contemporary neoliberalism Ability to explain regional differences in North America				
2.5. Course content broken down in detail by weekly class schedule (syllabus)	1. Territory and political borders of the United States and Canada 2-3. Natural regions and their factors 4. Climatic features of North America 5. History of colonization and territorial expansion. Development of structure of settlements. 6. History of international migration. Contemporary immigration flows. Multiethnic mosaic. Demographic features. 7. Population distribution and internal Migration 8. U.S. state structure, electoral system and foreign policy 9 -12. Economy: resources, agriculture, industry, transport 13-15. Cultural regions of the U.S. and Canada.				
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input checked="" type="checkbox"/> independent assignments <input checked="" type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:		
2.8. Student responsibilities	Class attendance, written seminar essay.				
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	0,5	Research		Practical training
	Experimental work		Report		(other)
	Essay		Seminar essay	0,5	(other)
	Tests	0,5	Oral exam	1	(other)
	Written exam	0,5	Project		(other)

DETAILED PROPOSAL OF THE STUDY PROGRAMME

2.10. Grading and evaluating student work in class and at the final exam	Class attendance (lectures and seminars), quality of seminar essay, multimedial presentation of seminar essay, written and oral exams.		
2.11. Required literature (available in the library and via other media)	Title	Number of copies in the library	Availability via other media
	Getis, A., Getis, J., Quastler, I., 2000: <i>United States and Canada: The Land and People</i> , McGraw-Hill Science.	2	Yes
	Birdsall, S. S., Florin, J., 1998: <i>An Outline of American Geography. Regional Landscapes of the United States, USA.</i> (http://beijing.usembassy-china.org.cn/uploads/images/tRfkvByOz2SpJ4Nw8NAM5g/outline_of_us_geography.pdf)		Yes
2.12. Optional literature (at the time of submission of study programme proposal)	<p>Agnew, J., Smith, J. (eds), 2002: <i>American Space/American Place: Geographies of the Contemporary United States</i>; London: Routledge, selected chapters.</p> <p>McKnight, T. L., 2003: <i>Regional Geography of the United States and Canada</i>, Prentice Hall.</p> <p>Birdsall, S. S, Palka, E. J., Malimowski, J. C., Price, M. 2.14. Other (as the proposer wishes to add)			

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Sanja Faivre	1.6. Year of the study programme	3 rd and 5 th
1.2. Name of the course	Geography of Latin America	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The course objectives are: acquiring knowledge from the field of regional geography of Latin America, its physical-geographical and socioeconomic properties and familiarising with the regional division of the area; developing professional competences from the main field of geography; developing competences for the autonomous research and the basis for working in the field of education.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowledge and understanding of: Regional geography of Europe and world.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. Ability to demonstrate the knowledge and understanding of essential facts, principles and theories in geography The ability to interpret and discuss actual geography-related problems and processes. The ability to transfer scientific information into education process, preparation and appropriate presentation of education materials. The skills needed for evaluation, interpretation and synthesis of relevant information. Teaching skills in various teaching forms, methods, techniques and strategies.</p> <p>Practical abilities and skills: Recognition and utilization of geographic information.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Generic abilities and skills: Conducting literature research and use databases and other information sources. Information-technology skills: presentation programmes usage, word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement needed in professional development. Skills related to the communication process in education.</p>		
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> -Understand and explain geographical position, meaning and delimiting Latin America -Explaining physical-geographical elements and factors and their interrelation and geosystem at the level of the continent, particular region and country, -Explaining causes and consequences of the population distribution, explaining the properties of settlements and economic activities in Latin America, -Differentiating urban and rural spatial systems, their structure and functional meaning, -Interpret economic-geographical systems and models, factors of development, dynamics and structure of the economy at the national, regional level and at the level of the continent. -Explaining historical-geographical development and actual geographical properties of Latin America -Apply general geographical knowledge in defining and solving spatial problems in Latin America -Developing skills needed for evaluation, interpretation and synthesis of relevant information. 		
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Introduction – defining the geographical Realm. Regions of the Realm. 2. Physical geography: <ol style="list-style-type: none"> 2.1. Shape and natural characteristics 2.2. Geological properties, 2.3. Relief, 2.4. Climate, 2.5. Hydrogeographical properties, 2.6. Natural regions. 3. Historical Aspects. 4. Population patterns. Latin American City. 5. Economic patterns. 6. Politics and territory. 7. Regional division. 8. Croatian diaspora in Latin America. 		
<p>2.6. Format of instruction:</p>	<p><input checked="" type="checkbox"/> lectures</p>	<p><input type="checkbox"/> independent assignments</p>	<p>2.7. Comments:</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<input checked="" type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)				
2.8. Student responsibilities	Regular attendance to courses and making seminar in a written form with oral presentation					
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance		Research		Practical training	
	Experimental work		Report		(other)	
	Essay		Seminar essay	0.5	(other)	
	Tests		Oral exam		(other)	
	Written exam	2.5	Project		(other)	
2.10. Grading and evaluating student work in class and at the final exam	The grade at the final exam is defined on regularity of attendance to courses, on evaluation of the seminar quality and written exam.					
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the library		Availability via other media
	Faivre, S., 2010: Internal script, <i>Geography of Latin America</i> , PMF, GO, Zagreb.			10		Yes
	Clawson, D. L., 2006: <i>Latin America & the Caribbean</i> , McGraw Hill, 422 pp.			5		Yes
2.12. Optional literature (at the time of submission of study programme proposal)	Blouet, B. W., Blouet, O.M., 2010: <i>Latin America and the Caribbean: A Systematic and Regional Survey</i> , 6th Edition, Wiley. de Blij, H. J., Muller, P. O., 2011: <i>Geography - Realms, Regions and Concepts</i> , John Wiley&Sons, 15th Edition. Bradshaw, M., Dymond, J., White, G., Chacko, E., 2007: <i>World Regional Geography</i> , McGraw Hill, New York.					
2.13. Quality assurance methods that ensure the acquisition of exit competences	Procedures set forth in the Regulations book and the Reference manual on quality management at the University of Zagreb, and at the Faculty of Science: - student questionnaire at the University and Faculty level -auto evaluation of courses: modernisation and revision of aims and content of the course, the strategy of teaching and learning; evaluation of learning outcome by the analysis of student success based on the Student office and our own records -questionnaire after exit of the University: evaluation of Integrated Education Programme					
2.14. Other (as the proposer wishes to add)						

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Anita Filipčić	1.6. Year of the study programme	3 rd and 5 th
1.2. Name of the course	Geography of Australia and Oceania	1.7. Credits (ECTS)	3
1.3. Associate teachers	Mladen Maradin	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The main learning objective is to define the geographical specialities of Australia and Oceania. One must determine the actual importance of Australia in the global world and the characteristics of economic development. The course helps students to detect the differences between Australia and other megaregions and to determine the positive and the negative components of these differences.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	Developing of cognitive, practical and generic abilities and skills: knowing and understanding the regional specifics and global world, getting the professional competencies of core science and the research work competencies and in teaching geography.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>Knowledge, understanding and independent explanation of geographical position of Australia and Oceania, phases of settlement, elements and factors of physical geography and their interactions, the continental, regional and country geosystems.</p> <p>Knowing, understanding and independent explanation of physical geography influence on population distribution, settlement features, economic activities and area valorisation.</p> <p>Knowing, understanding and independent explanation of urban and rural spatial systems, shier structure and functions.</p> <p>Knowing, understanding and independent explanation of economic geographical systems and models, developing factors, dynamics and structure of continental, regional and national economies.</p> <p>Knowing, understanding and independent explanation of New Zealand and Oceania features, as well as the importance of Australia and Oceania for global economy.</p> <p>Developing of skills needed for independent logging data, evaluation, explanation and synthesis of relevant informations.</p> <p>Developing of skills needed for presentation of scientific work, written and oral briefing.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	Application of appropriate statistic and graphic methods for analysis and presentation of research work. Developing of skills needed for independent databases use ad literature research.				
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ol style="list-style-type: none"> 1. Geographical position of Australia and Oceania. Geographical peripheral quality and isolation. 2. The settlement of Australia and Oceania. 3. Relief of Australia and Oceania. The relief development and relief units. 4. The influence of the relief on the demographic and economic development. 5. The climate and waters of Australia. 6. The climate influence on space valorisation. Drought in Australia. 7. Population of Australia. The immigration politics. 8. The basic demographic indicators. The Croats in Australia and New Zealand. 9. The Australian cities – the space concentrating role. 10. The Australian economy. The phases in economic development. 11. The relations of Australian and Asian economies. The economic importance of Australia in the global world. 12. New Zealand – similarities and differences to Australia and the rest of Oceania. 13. Population and cities of New Zealand. 14. The New Zealand economy. 15. Oceania – specifies and geographical problems. 				
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input checked="" type="checkbox"/> independent assignments <input checked="" type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:		
2.8. Student responsibilities	Class and presentations attendance. Writing and presentation of seminar paper.				
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	0.25	Research		Practical training
	Experimental work		Report		(other)
	Essay		Seminar essay	0.50	(other)
	Tests		Oral exam		(other)
	Written exam	2.25	Project		(other)
2.10. Grading and evaluating student work in class and at the final exam	Attendance and active contribution to class, seminar writing and presentation, written exam.				
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the	Availability via other media

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Borna Fuerst-Bjeliš	1.6. Year of the study programme	3 rd
1.2. Name of the course	Mediterranean	1.7. Credits (ECTS)	3
1.3. Associate teachers	Marin Cvitanović	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Acquiring fundamental knowledge of the concept, significance and space of the Mediterranean as a region /place. Discussing the identity elements. Understanding of the Mediterranean as a link of continents and cultures. Acquiring fundamental knowledge of the environment, processes of degradation and natural and environmental risks; elements of cultural heritage. Developing particular cognitive, practical and generic abilities and skills: applying knowledge in determining, defining and solving spatial problems of medium-level complexity, skills needed for evaluation, interpretation and synthesis of relevant information, skills needed for presenting scientific contents and stances in written and oral form.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowledge and understanding of: Causality relations between the elements and factors of natural environment and society at the regional level; understanding of causal relations of dominant degradation processes and formation of cultural landscapes as the outcomes of millennial man-environment interactions in Mediterranean. Knowing and understanding the uniqueness of the Mediterranean.</p> <p>Cognitive and practical abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. Ability to demonstrate the knowledge and understanding of essential facts, and contemporary processes of the Mediterranean, regional uniqueness and global image of the modern world. Demonstrating and discussing the causal relations of dominant degradation processes and formation of cultural landscapes as the outcomes of millennial man-environment interactions in Mediterranean The ability to transfer scientific information on Mediterranean into education process, preparation and appropriate presentation</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>of education materials. Development of research abilities and teaching skills of regional geography. The skills needed for evaluation, interpretation and synthesis of relevant information Recognition and utilization of geographic information on Mediterranean. Conducting literature research and use databases and other information sources on regional geography. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement needed in professional development.</p>	
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Understanding of the uniqueness of the Mediterranean as a consequence of linking the different cultures in the unifying conditions of environment and life rhythms'. Knowing and understanding the uniqueness of the environment. Knowing and understanding the causal relations of dominant degradation processes and formation of cultural landscapes as the outcomes of millennial man-environment interactions in Mediterranean. Recognition of the cultural landscape (and heritage) elements and its significance for the economy and development (tourism).</p>	
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Concept of the Mediterranean. Significance and identity. 2. Unity and fragmentation. 3. Inner divisions and conceptualization. Regional divisions. Eumediterranean unity. 4. European and African-Asian links 5. Adriatic in the Mediterranean. 6. Geopolitical themes of the Mediterranean 7. Geological evolution of the Mediterranean. 8. Earthquakes, volcanism 9. Mediterranean climate 10. Mediterranean vegetation 11. Mediterranean vegetation of Croatia 12. Degradation, desertification and risks 13. Mediterranean and Adriatic seas 14. Adriatic hydrological system. Islands 15. Cultural landscapes and urban heritage of the Mediterranean 	
<p>2.6. Format of instruction:</p>	<p>X lectures X seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work</p>	<p>X independent assignments X multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)</p>
		<p>2.7. Comments:</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

2.8. Student responsibilities	Working and completion of project /assignment; working and discussing the selected texts/articles; completion of tests and written exam.				
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance		Research		Practical training
	Experimental work		Report		(other)
	Essay		Seminar essay		(other)
	Tests	1	Oral exam		(other)
	Written exam	1	Project	1	(other)
2.10. Grading and evaluating student work in class and at the final exam	Final evaluation is the result of: two tests completed; completed project and final written exam.				
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the library	Availability via other media
	Conti, S., Segre, A., (eds.),1998: <i>Mediterranean Geographies</i> , Societa Geografica Italiana, CNR, 359.			5	Yes
	Hughes, J. D., 2005: <i>The Mediterranean, An Environmental History</i> , ABC CLIO, Santa Barbara, Denver, Oxford, 333.			5	Yes
	King, R., De Mas, P., Mansvelt Beck, J. (eds.), 2001: <i>Geography, Environment and Development in the Mediterranean</i> , Sussex Academic Press, Brighton, Portland, 291.			5	Yes
	Matić, S. (ur.), 2011: <i>Šume hrvatskog Sredozemlja</i> , Akademija šumarskih znanosti, Zagreb, 740.			10	Yes
2.12. Optional literature (at the time of submission of study programme proposal)	Woodward, J. (ed.), 2009: <i>The Physical Geography of the Mediterranean</i> , Oxford Regional Environments, Oxford University Press, 663. Mazzoleni, S., di Pasquale, G., Mulligan, M., di Martino, P., Rego, F., (eds.), 2005: <i>Recent Dynamics of the Mediterranean Vegetation and Landscape</i> , Wiley, 306. Grove, A. T., Rackham, O. (eds.), 2001: <i>The Nature of Mediterranean Europe, An Ecological History</i> , Yale University Press, New Haven, London, 384.				
2.13. Quality assurance methods that ensure the acquisition of exit competences	In accordance with the Rule Book and the Manual of quality management of the University of Zagreb and the Faculty of Science.				
2.14. Other (as the proposer wishes to add)	-				

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Laura Šakaja	1.6. Year of the study programme	3 rd
1.2. Name of the course	Geography of Russia	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Acquiring knowledge of spatial aspects of recent social, economic and political processes in Russia. Understanding the post-socialist transition process and the new geopolitical developments in the post-Soviet era. Seminar essay will contribute to the ability to conduct synchronic and diachronic analysis, to apply knowledge gained during study process and to map geographic data.		
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes	<p><u>Professional knowledge, abilities and skills:</u></p> <p><i>Knowledge and understanding of:</i> Elements and factors in physical geography and their interrelationship on various spatial levels. Factors and consequences of the spatial distribution of population, settlements and economic activities in Russia Urban and rural spatial systems in Russia, their interrelationship and structural and functional characteristics Systems and models in economic geography, their structure, dynamics and development factors on various spatial levels.</p> <p><u>Cognitive, practical and generic abilities and skills:</u> Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. Ability to present knowledge and understanding of concept of regional geography Ability to transfer scientific knowledge on Russia into education contents The skills needed for evaluation, interpretation and synthesis of relevant information Conducting literature research and use databases and other sources of information.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results. Knowing, understanding and explaining the factors that determined the historical and geographical development of the Russian state Knowing and understanding the new trends in the development of Russia in post-socialist period Ability to explain the cultural diversity of the Russian Federation Ability to allocate and interpret RF foreign policy guidelines Ability to evaluate the role of Russian Federation in the global geopolitical order and the global economy Knowing and understanding the processes of formation of economic regions of the Russian Federation Ability to explain regional differences in Russian federation.</p>																																		
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<p>1. Territory and political borders of Russian federation 2 -3. Natural regions and their factors 4. History of colonization and territorial expansion 5. Ethnic and religious mosaic of Russia. Population structure 6. Population distribution and internal migration 7. Post-socialist transition and the Russian economy. Developmental resources. 8-9. Russian economy in the post-industrial environment: industry, agriculture, transport. 10. Urbanization process and cities. 11. Economic regions and the administrative-territorial structure of the Russian Federation 12-14. Regional overview of the Russian Federation 15. Problems and prospects in Russian foreign policy and international relations</p>

DETAILED PROPOSAL OF THE STUDY PROGRAMME

1. GENERAL INFORMATION			
1.1. Course teacher	Ružica Vuk	1.6. Year of the study programme	3 rd
1.2. Name of the course	Geography of Africa	1.7. Credits (ECTS)	3
1.3. Associate teachers	-	1.8. Type of instruction (number of hours L + S + E + e-learning)	30+15+0+0 (2+1+0+0)
1.4. Study programme (undergraduate, graduate, integrated)	Integrated Undergraduate and Graduate University Study in GEOGRAPHY and HISTORY; Course: EDUCATION	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	Application of knowledge and skills acquired in the basic/fundamental geographic courses on the area of Africa. Getting to know and interpret contemporary natural geographical features and social development of the continent, the impact of historical-geographical development on present relations and problems of the continent, the position and significance of the continent in the contemporary geopolitical and economic relations.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>The course <i>Geography of Africa</i> contributes to the acquisition of professional competences in geography science, to the development of cognitive, practical and generic abilities and skills for further education, competences for independent research work and acquiring the vocation of Master education of geography.</p> <p>Professional knowledge, abilities and skills <i>Knowledge and understanding of:</i> Geographic terminology, definitions and theories. Methodology application in geography and current investigations in its field. Elements and factors in physical geography and their interrelationship in geosystems at the continental level. The role of population in processes and functional spatial organization in Africa. Urban and rural spatial systems, their interrelationship and structural and functional characteristics. Systems and models in economic geography, their structure, dynamics and development factors at the continental level. Factors of development and characteristics of transportation modes, transportation networks, dynamics of transportation flows, impacts of relationship of transport and other economic activities in Africa.</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>Processes in political geography, with emphasis on globalisation and integration processes at the continental and regional level. Causality relations between the elements and factors of natural environment and society in different countries and regions of Africa.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity in Africa. The ability to interpret and discuss relevant and actual geographic problems and processes in Africa. The skills needed for evaluation, interpretation and synthesis of relevant information. The skills needed for presenting scientific contents and stances in written and oral form.</p> <p>Practical abilities and skills: Applying appropriate statistic and graphic methods and techniques in analysis and in the presentation of the research results. Applying appropriate maps and cartographic methods and techniques in analysis and in the presentation of the research results.</p> <p>Generic abilities and skills: Problem solving, relating to qualitative and quantitative geographic information. Conducting literature research and use databases and other sources of information. Information-technology skills: word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Continuous professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>After completing this course and passing the exam, students will (be able to):</p> <ul style="list-style-type: none"> - know and understand the geographic location and the position of Africa, elements and factors in physical geography and their interrelationship in geosystems at the continent level, and at the level of various regions and countries of Africa - interpret the causes and consequences of population distribution, settlement characteristics and economic activities in Africa - distinguish urban and rural spatial systems, their structural and functional features - explain systems and models in economic geography, their structure, dynamics and development factors at the continental level - explain the particularities of regional and national economies - know, understand and independently interpret geographical aspect of socio-cultural processes in Africa, historical-geographical development and contemporary geographical features of Africa - analyze processes in political geography, with emphasis on globalisation and integration processes at the continental and regional level - interpret causality relations between the elements and factors of natural environment and society in different countries and

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	regions of Africa - apply cognitive, practical and generic abilities and skills in the analysis and presentation of research results				
2.5. Course content broken down in detail by weekly class schedule (syllabus)	1 Geographical features of the continent 2 Natural-geographic features as a factor of the colonization and settlement, and economic exploitation of the continent 3 Historical-geographical development of Africa 4 Contemporary geographical problems and processes in Africa 5 Processes of colonization 6 Decolonization of Africa 7 Population of Africa 8 Economy of Africa 9 Northeast Africa 10 Northwest Africa 11 West Africa 12 East Africa 13 Equatorial Africa 14 South Africa 15 The Republic of South Africa

1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	The main object of the course is to enable students to understand complex relations in the less developed countries (functional, social and morphological transformations). Particular objects of the course are: synthesis of contemporary theory and methodology on transformations in the less developed countries, which are induced by the interaction of different economic, social, cultural and political factors on global, regional and local scale. On the number of examples from various less developed regions and countries of the world, problems like excessive exploitation of natural resources, population growth, over-urbanisation etc. will be discussed and explained. Special attention within this course is given to: writing of report, reading of selected texts related to the different aspects of the development of less developed countries, thematic discussions on different topics etc.		
2.2. Course enrolment requirements and entry competences required for the course	-		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Knowledge and understanding of: Geographic factors (physical and social) in the development of the less developed countries. Contemporary processes and problems in the development of the less developed countries.</p> <p>Cognitive abilities and skills: Applying knowledge in determining, defining and solving spatial problems of medium-level complexity. Ability to demonstrate the knowledge and understanding of essential facts, principles and theories in geography The ability to interpret and discuss actual geography-related problems and processes. The ability to transfer scientific information into education process, preparation and appropriate presentation of education</p>		

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>materials. The skills needed for evaluation, interpretation and synthesis of relevant information.</p> <p>Practical abilities and skills: Recognition and utilization of geographic information. Skills related to the usage of education materials and apparatus. Applying methodology in education-related research.</p> <p>Generic abilities and skills: Conducting literature research and use databases and other information sources. Information-technology skills: presentation programmes usage, word-processing and spreadsheet usage, data logging and storage, subject-related use of the Internet. Functioning effectively as an individual and as a team member. Autonomous continuous professional improvement needed in professional development.</p>
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ul style="list-style-type: none"> - distinguish and explain approaches in the research of the less developed countries - explain historic geographic context of the development of the less developed countries - conduct a research project on the topic (for example: demographic, urban, economic development, excessive exploitation of natural resources and the impact that it has on the environment etc). in a selected less developed country or a region of the world - write a report/essay on a topic related to regional differences in the less developed countries
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1 INTRODUCTORY LECTURE – Goals and aims; Students obligations; Schedules of written and oral exams; Definitions of main notions and terms 2 THEORETICAL FRAMEWORK – Theories and models of the less developed countries; Spatial determination of the less developed countries 3 HISTORIC GEOGRAPHIC CONTEXT OF THE DEVELOPMENT - European expansion from 15th to 19th century (mercantile period); European expansion from 19th to mid 20th century (period of industrial colonialism); Decolonisation 4 DEMOGRAPHIC CHARACTERISTICS 1 – Number, distribution and population density 5 DEMOGRAPHIC CHARACTERISTICS 2 – Migrations; Structures of the population; Population policy 6 AGRICULTURE – Characteristics of agricultural production; Agriculture and environment; Expansion of agricultural land use 7 RURAL AREAS – Models of the development of rural areas; Transformation of traditional rural structures; Socioeconomic transformations; Abandoning of rural areas 8 URBANISATION 1 – Characteristics of urbanisation in the less developed countries; Influence of immigration; Spatial structure of the cities 9 URBANISATION 2 – Housing problems; Squatter settlements; Emergence of megacities; Urban planning in the less

DETAILED PROPOSAL OF THE STUDY PROGRAMME

	<p>developed countries 10 ECONOMIC GEOGRAPHIC CHARACTERISTICS 1 – Natural resources; Industrialisation (colonial and postcolonial period); Structure of economic sectors; Employment and unemployment 11 ECONOMIC GEOGRAPHIC CHARACTERISTICS 2 – Tertiarisation; Unequal economic development; Influence of multinational companies; Integration into global economy; New dependence 12. REGIONAL DEVELOPMENT (SELECTED EXAMPLES) – Regional differences and development; Regional plans, programs and models; Regional planning; Development strategies 13. SOCIOCULTURAL CHARACTERISTICS – Changes in the way of life; Relations towards/with developed countries of the world; Importance of religion; Ethnic diversity 14. POLITICAL CHARACTERISTICS – Colonial heritage; Political particularism; Area of conflict, Political and economic associations 15. GLOBALISATION – Less developed countries in a globalised world; Assumption of the future development</p>				
2.6. Format of instruction:	x lectures x seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> on line in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	x independent assignments x multimedia and the internet <input type="checkbox"/> laboratory X work with mentor <input type="checkbox"/> (other)	2.7. Comments:		
2.8. Student responsibilities	Regular class attendance. Writing of the report. Oral presentation of the written report within the thematic discussions.
