

# Universität Koblenz-Landau - International Master in Ecotoxicology

Dear Madam, dear Sir,

we would like to draw your attention to our university's **International Master program in Ecotoxicology** which is conducted in English and could be of interest to your students.

Human impact on ecosystems is in the news on a daily basis and the necessity of facing the problem is acknowledged on a political level. Ecotoxicology studies the effects of chemicals on the environment, develops concepts for risk management and predicts ecological consequences.

The **University of Koblenz-Landau** was in 2009 the first university in Germany to offer an International Master program in Ecotoxicology and has since then attracted many participants from all over the world. The program comprises **four semesters of full-time study** with a total amount of 120 European Credit Transfer System (ECTS) points and **starts with the winter semester in October 2014**.

The master program offers a well-balanced combination of theoretical and practical courses at the university and internships at other research institutions and in industry. As a result the graduates are well prepared for many employment opportunities in an emerging field of science with **excellent career perspectives**, e. g. at scientific facilities and research institutes, government agencies, industry and consulting enterprises.

For more information please visit our website [www.master-ecotoxicology.de](http://www.master-ecotoxicology.de) where your students find all the information they need and also useful links with application details.

In our [flyer](#) you find an overview on the study program, admission requirements and employment outlooks.

Please let us know if you have any further questions, we are very happy to be of help:
