# PROMISE

## Better health through innovation in education

## Personalised Medicine Inquiry-Based Education

Co-funded by the Erasmus+ Programme of the European Union

## Personalised Medicine

Learn the basic concepts and technologies behind personalized medicine and custom-made treatments taking into the account the Responsible Research and Innovation principles.

**One size doesn't fit all!**

## Participatory medicine

Understand why and how patients and community can be included in research and healthcare in line with Responsible Research and Innovation principles.

**Better together!**

## Preventive Medicine

Find out the importance of lifestyle in maintaining the well-being and preserving one's health.

**Prevent rather than cure!**

## Predictive Medicine

Grasp the basic principles of different -omics and how they can be applied in predictive medicine.

**Look into the future!**

## Welcome to PROMISE modules!

Expert researchers will guide you through the modules in video lectures and written materials.

Our moderators will help you prepare for online quizzes, and you and your peers will work together on group projects.

In those, you will get the chance to apply new knowledge and responsible research principles.

At the end of the course, you will be awarded a certificate.

With the support of the EU Commission, the PROMISE project brought together an international and interdisciplinary group of experts from the P4 medicine ecosystem to design and create an engaging and interactive teaching program on the most relevant health technologies which will shape the medicine of the future.

“Such is the depth of the paradigm shift that P4 Medicine is inducing that we believe it will be successful only if coupled with a comprehensive P4 Education.”

dr. Leroy Hood

**Erasmus+**

**Sign up for the P4 medicine course, learn with us and become fluent in the language of the future!**
