European Union

Winter School Innovation Leaders in BioMed & Health

Background and aims

Winter School Innovation Leaders in BioMed & Health 2021 is organised as a series of online events for early career researchers and professionals interested in gaining skills needed to succeed as leaders in health research and innovation.

The Winter School aims to provide a supportive and stimulating international setting where participants can present innovations originating from their research, receive feedback, and establish valuable business and academic contacts for the future.

One can take part in Winter School 2021 webinars and workshops separately or sign up for the whole programme of events.

Topics to be covered include:

- **15 November:** BioMed & Health Leadership (webinar)
- **16 November:** Securing Research and Innovation Funding (webinar)
- **17 November:** New Venture Creation (webinar)
- **19 November:** Partnering for Innovation (webinar)
- **22 November:** Startup Entrepreneurship for Researchers (online workshop)
- **23 November:** Communicating your Work to Partners and Funders (online workshop)

Who should attend:

Winter School 2021 is open to students, PhD candidates, early career researchers, industry professionals and all those interested in biomed and healthcare innovation careers.

In order to obtain the Winter School Innovation Leaders in BioMed & Health certificate, participation in 80% of the programme is needed. You will be able to meet this requirement by attending 2 online workshops and 2 webinars OR by attending 1 online workshop and 4 webinars.

The University of Zagreb Faculty of Pharmacy and Biochemistry has preapproved the Winter School as an elective course within the framework of the doctoral Pharmaceutical-Biochemical Sciences study programme (5 ECTS).

All participants should have a professional proficiency in English (the working language of the School).

Registration and Deadline:

Registration is required to participate in one or more Winter School Innovation Leaders 2021 events. Participation in all events is free of charge.

Registration for workshops on 22nd and 23rd November is limited to 40 participants. Registration for webinars is limited to 90 participants. Registration closes one day before each specific event or when event capacity is reached.

School Certificate and PhD Study Programme

To obtain the Winter School Innovation Leaders in BioMed & Health certificate, participation in 80% of the programme is needed. You will be able to meet this requirement by attending 2 online workshops and 2 webinars OR by attending 1 online workshop and 4 webinars. You are of course welcome to register for more!

The University of Zagreb Faculty of Pharmacy and Biochemistry has preapproved the Winter School as an elective course within the framework of the doctoral Pharmaceutical-Biochemical Sciences study programme (5 ECTS).

EIT Health Innovation Challenge – Power of Data in Pharmaceutical Industry

This year we are complementing the School with the event that provides an opportunity to put your skills immediately to practice: EIT Health Innovation Challenge – Power of Data in Pharmaceutical Industry. During this guided creation event you will be able to learn about data science trends in pharma, connect with peers from multiple disciplines, and explore the playing field in this technology and market area. This will allow you to identify and pitch solutions to industry and gain their feedback, informing your path towards new market ready products or services.

The Innovation Challenge is a standalone multi-day event, scheduled for November 29 - December 3, 2021, and will have a separate registration. Please sign up here to be informed when the registration opens:
