

1. GENERAL INFORMATION OF THE STUDY PROGRAMME						
1.1. Name of the study programme	Geography; course: Education					
1.2. Provider(s) of the study programme	University of Zagreb, Faculty of Science					
1.3. Type of study programme	Vocational study progra	ocational study programme				
1.4. Level of study programme	Undergraduate	Graduate 🛛	Integrated Destgraduate specialist			
1.5. Manner of implementation of the study programme	Classical 🛛	Mixed (Classical + online)	Online in entirety			
1.6. Academic/vocational title earned at	The bearer of this qualification is authorised to use the legally protected academic title of Master of Education in					
completion of study	Geography (Mag. Educ	Geography (Mag. Educ. Geogr.).				

2. INTRODUCTION	
2.1. Reasons for starting the study programme	On the basis of official approval granted in 2005, the Dept. of Geography of the Faculty of Science of the University of Zagreb has been conducting a Graduate Research Study Programme in Geography since the 2008/2009 academic year. By way of the process of self-evaluation of teaching and on the basis of procedures stemming from the quality management system at the University of Zagreb (university student surveys, evaluation of study as a whole, questionnaires on study completion), the need has been identified for changes and augmentation of the study programme, particularly in the domain of attaining pedagogical-psychological-didactical-methodological competence, which has also been prompted by changes in the domain of attaining competence in the basic sciences. The changes have been made with the approval of the Faculty Council, the Quality Management Board and the Senate of the University of Zagreb. After issue of the <i>Pravilik o postupku vrednovanja studijskih programa sveučilišnih preddiplomskih, diplomskih i integriranih preddiplomskih i diplomskih te stručnih studija Sveučilišta u Zagrebu</i> (Regulations on the Process of Evaluating Study Programmes of University of Zagreb, it was established that the scope of the changes was just over 40 %, which was regarded as a demand for evaluating the new study programme that obliged the designee of the approval and the Provider of the Study Programme to fill in the forms for evaluation of the Graduate Educator University Study program was implemented from 2016/2017, and from 2020/2021. amendments are introduced.

	health, conservation of Nature and the human environment and other democratic values. Geography opens up new possibilities for development of Croatian national, cultural, and spiritual identity within the complex globalisation process. In this period of the more emphasised integration of Europe, Geography points simultaneously to the importance of multi-culturalism, tolerance and to the European dimensions of Croatian society. Geography has particular importance in the promotion of the values to which the National General Curriculum pays particular attention, and those are knowledge, solidarity, accountability and identity. By the structure of the teaching programme, the objectives and outcomes of teaching and learning Geography contribute to the development of all eight basic competences (communication in the mother tongue, communication in foreign languages, mathematical competence in natural science and technology, digital competence, learning how to learn, social and civil competence, initiative and enterprise and, particularly, the development of cultural awareness and expression) and all inter-subject themes. The tradition of the representation of Geography in the school system reaches back to the very beginning of modern Croatian education. With the establishment of the Chair of Geography at the Faculty of Philosophy in Zagreb in 1883, the systematic training of Geography teachers began. The Dept. of Geography of the Faculty of Science,
2.2. Assessment of the study programme's usefulness relative to the demand in the labour market in the public and private sectors	University of Zagreb, has been continuing that tradition right up until the present day. According to the results of scientific research of human potential in the teaching of Geography in elementary and secondary schools in the Republic of Croatia, along with research into demographic development at the level of individual enrolment fields, the labour market in the public and the private sector have an annual need for some twenty to thirty Master of Education in Geography.
2.3. Compatibility of the study programme with the University mission and the strategy of the proposer, as well as with the strategy statement of the network of higher education institutions.	The proposed programme has been coordinated with the Development Strategy of the University of Zagreb (the ISKORAK 2001 initiative), the Research Strategy of the University of Zagreb 2008-2113, the Act on Higher Education of the University of Zagreb 2008-2013, the Bologna Declaration, the Strategic Development Plan of the Faculty of Science of 2008 and other documents connected with science and higher education. The proposed study programme has been coordinated with the Network of Higher Education Institutions and the study programme in the Republic of Croatia (the NVVO).
2.4. Comparability of the study programme with other accredited programmes in higher education institutions in the Republic of Croatia and EU countries (name two programmes at most, of which one is from an EU country, and	In structure and competences on completion of the proposed Study Programme, it is partly comparable with the following programmes: - the Graduate University Study in Geography (course education) – two subjects, University of Zadar, Dept of Geography, http://www.unizd.hr/Portals/6/DokumentiOdjela/Diplomski_dpd_14-15.pdf - One subject graduate university study of Applied Geography, University of Zadar, Dept of Geography, http://www.unizd.hr/Portals/6/DokumentiOdjela/Diplomski_jpd_14-15.pdf
compare it with the proposed programme (provide internet addresses of the programmes)	- the Second Level of the Master of Pedagogy Two-subject Study Programme in Geography, University of Ljubljana, Faculty of Philosophy, Dept. of Geography, http://geo.ff.uni-lj.si/sites/default/files/ge2_dvo-ped_2015-2016.pdf

University of Zagreb

2.5. Openness of the study programme to student mobility (horizontal, vertical in the Republic of Croatia, and international)	The proposed programme enables the mobility of students during study with the recommendation and supervision of coordinators and application of the ECTS grading scale. It should be emphasised that even up until now the Faculty of Science has stimulated and facilitated the mobility of students. In 1992, the Faculty of Science achieved <i>de facto</i> equalisation of the graduate level in the former undergraduate study with the Master's level (MSC) in study programmes at various European and non-European countries. On the basis of its own experience (1988), the Faculty of Science accepted the role in 1999 of a pilot-project institution for the university project introducing ECTS grades, and introduced the ECTS grading scale in all its departments. The Faculty of Science was among the first faculties to introduce the Supplemental Diploma (1998) and Appendix according to ERASMUS. In accordance with that, it has achieved mobility in its Geography programmes to date, primarily of non-Croatian students and lecturers. In the entire Faculty of Science, the Dept. of Geography leads the way in the mobility of its students going abroad and students coming from abroad. As part of the ERASMUS and CEEPUS projects, an average of some ten students come to the Department, while some fifteen students from the Department of Geography leave for other universities at the same time. We encourage the mobility of students and lecturers from higher education institutions, with which institutional cooperation already exists: <ul> <li>the Dept. of Geography, University of Zadar</li> <li>the Dept. of Geography of the Faculty of Philosophy, University of Mostar (Bosnia-Herzegovina)</li> <li>Eotvos Lorand University, Budapest (Hungary)</li> <li>the Faculty of National Science, University of Mostar (Bosnia-Herzegovina)</li> <li>Eotvos Lorand University, Budapest (Hungary)</li> <li>the Institute of Geography, Leipzig (Germany)</li> <li>the Institute of Geography of the Faculty of Regional and Spatial Planning (Germany)</li> <li>the Institut</li></ul>
	the Institute of Geography and Spatial Planning, St Gallen University (Switzerland)

2.6. Relationship with the local community (economy, entrepreneurship, civil society, etc.)	The Dept. of Geography has also successfully implemented the mobility of its lecturers and associates with the aim of research and continuous advanced learning, and the exchange of experience in the preparation of new projects. At least two university lecturers from abroad take part in teaching at the Dept. of Geography every year. The vertical mobility of students is achieved through the openness of Graduate Study to students from other departments of the Faculty of Science, other faculties within the University of Zagreb and from other universities in Croatia and from abroad. In relation to the number of students who continue their studies at the graduate level, and who have finished study at a preceding level at some other faculty, the Dept. of Geography is the leading department at the Faculty of Science. We expect a further increase in the vertical mobility of students with the newly proposed manner of enrolment in graduate study. Geography Teaching Practice is implemented at the Mladost Elementary School, the Fran Galović Elementary School, the Ljubljanica Elementary School, the Jabukovac Zagreb Elementary School, the Tin Ujević Elementary School, the 1 <sup>st</sup> Grammar School, the 4 <sup>th</sup> Grammar School and the 11 <sup>th</sup> Grammar School – all exercise schools. In that way, the Graduate University Study of Geography in Education is linked with the economy and the local
2.7. Compatibility with requirements of	community. The proposed Graduate Study Programme is coordinated with the Statute of the Croatian Geographical Society
professional organizations 2.8. Name possible partners outside the higher	(www.hagede.hr) – the umbrella professional organisation of geographers in Croatia. Elementary school and secondary school institutions outside the system of higher education for the Graduate University Study in Geography in Education have distinguished themselves. They are the Agency of Education, the
education system that expressed interest in the study programme	National Centre for External Evaluation of Education, and the Agency for Vocational Education and Adult Education.
2.9. Other (as the proposer wishes to add)	

3. GENERAL INFORMATION	
3.1. Scientific/artistic area of the study programme	Interdisciplinary areas of science, the field of Geography
3.2. Duration of the study programme (is there an option of distance learning, part-time studying, etc.)	The study period lasts two years (4 semesters), there are no possibilities for distance learning and part-time study, although a demand exists on the labour market for part-time study.
3.3. The minimum number of ECTS required for completion of study	120 ECTS scale grades

	Condidates who have completed lindewareducts Otude of Cooperative may completer corrective constructs to the					
3.4. Enrolment requirements and admission	Candidates who have completed Undergraduate Study of Geography may apply for competitive enrolment in the					
procedure	Graduate University Study of Geography – Education. Candidates are rank-listed according to the average grade of					
	all the examinations passed calculated up to the third decimal point.					
	Gg_27 analyze theories of educational geography					
	Gg_28 interpret the basic methodology of education research					
	Gg_29 explain the theoretical foundations of pedagogy and didactics					
	Gg_30 interpret the contents of sociology and psychology in upbringing and education					
	Gg_31 analyze the elements needed for the preparation, implementation, evaluation and administration of					
	geography teaching in primary and secondary schools					
	Gg_32 interpret the possibilities of applying the relevant regulations in the field of primary and secondary education					
	Gg_33 to shape the contents of the regional geography of Europe and the world for application in the teaching of					
	geography					
	Gg_34 improve the application of knowledge in identifying, determining and solving spatial problems of medium					
	complexity					
	Gg_35 argue the importance of knowledge and understanding of essential facts, concepts, principles and theories in					
	geography					
	Gg_36 interpret geographically relevant and current phenomena and processes, with argumentative representation					
3.5. Learning outcomes of the study programme	of the geographical approach in discussions					
(name 15-30 learning outcomes)	Gg_37 transfer scientific to educational content in written preparations for teaching geography, with an appropriate					
	presentation of educational content					
	Gg_38 apply skills for monitoring, checking and assessing student achievement in primary and secondary school					
	teaching, evaluation of teaching and geography curriculum					
	Gg_39 apply the skills needed to evaluate, interpret and synthesize information and data					
	Gg_40 to teach geography independently, applying different forms of teaching, teaching methods and techniques,					
	as well as teaching aids and teaching strategies					
	Gg_41 apply spatial orientation skills with the help of modern technologies and skills needed to conduct fieldwork					
	class					
	Gg_42 to realize the activities necessary in the organization, realization and evaluation of fieldwork class					
	Gg_43 select geographic information for use in geography teaching					
	Gg_44 select relevant teaching aids for teaching					
	Gg_45 apply appropriate methodology in education research					
	Gg_46 evaluate the knowledge gained by searching the literature and sources					
	Og_to evaluate the knowledge gamed by searching the intractile and sources					

	Gg_47 improve the application of IT skills in data collection, storage, visualization and presentation, and the use of distance learning tools Gg_48 transfer to team members the specialized knowledge necessary for effective work, independently and in a team Gg_49 plan participation in lifelong learning for the purpose of professional advancement and professional development Gg_50 communicate effectively with all stakeholders in the education system Gg_51 apply classroom management skills
3.6. Employment possibilities (list of potential employers) and opinion of three organizations associated with the labour market on the adequacy of anticipated learning outcomes (attach)	The Provider of the qualifications is trained for work in education in Geography in primary and secondary schools, and in the general assignments in education in public service.
3.7. Possibilities of continuing studies at a higher level	After completion of the Graduate University Study in Geography; course: Education, students may enrol in the Doctoral Study of Geography: space, region, environment, landscape, that represents a continuity of the Graduate Study established as far back as in 1960/1961, which has been expanded, augmented with new subjects and innovated since then. The Doctoral Study of Geography: space, region, environment, landscape, lasts for three years, and the academic level attained on its completion is Doctor of Science (DSc). Students may also enrol in doctoral study at some other universities and in some other doctoral study programmes in Croatia and abroad.
3.8. If submitting proposals for graduate studies, name undergraduate studies of the proposer or other institutions that qualify for admission to the proposed graduate study	The undergraduate university study in Geography; course: research. Provider: Faculty of Science of the University of Zagreb. The undergraduate university study of Applied Geography; course: research. Provider the Dept. of Geography, University of Zadar.

4. DESCRIPTION OF THE STUDY PROGRAMME					
4.1. List of mandatory and elective courses and/or modules with class hours and ECTS credits (appendix: Table 1)					
4.2. Description of each course (appendix: Table 2					
4.3. Structure of the study (number of semesters,	Number of semesters: 4				
trimesters, class size for lectures, seminars,	Size of lecture groups: 25 students				
exercises) Size of groups for exercises/seminars: 25 students					
	In keeping with the Regulations on Study at the Faculty of Science and of the University of Zagreb.				
4.4. Requirements for enrolment in successive semesters or trimesters or					

	as being encumbered [with an outstanding obligation], which means that he/she can enrol in subjects from subsequent years of study (under the condition that he/she has passed the foregoing prescribed subjects), up until fulfilment of the total encumbrance of 35 ECTS scale grades at the most. The preconditions (the preceding subjects) for enrolment in individual subjects (the subsequent subjects) shall be noted ahead of the appertaining tables that contain the Lecture Schedule. In order to enrol in the subsequent subject according to the programme in the semester that immediately precedes it, it shall be necessary merely to attend lectures on the preceding subject, and to pass that subject prior to the subsequent one. Students of the Graduate University Study in Geography; course: Education may choose elective subjects from the list of Geographical Elective Subject in Integrated Undergraduate and Graduate University Study in Geography and History/History and Geography; course: Education, subjects from Regional Geography and the geography of similar
4.5. List of courses and/or modules that the student can take in other study programmes	sciences from the list of Geographical Elective Subject in the Undergraduate University Study in Geography; course: Research (if they have not passed them during their undergraduate studies) as well as subjects from the list of pedagogical-psychological-methodological subjects in Integrated Undergraduate and Graduate University Study in Geography and History/History and Geography. Extra-curricular students may also enrol in other subjects at sectors of the University of Zagreb in agreement with the subject lecturer. Over the last three years, up to five students have been enrolling parallel in Graduate University Study in Geography; course: Education, and one of the specialisations in Graduate University Study in Geography; course: Research (paying tuition fees in keeping with the decisions of the authorised Ministry and the University of Zagreb). Under the same conditions as from the 2012/2013 academic year, alumni who have completed study in one of the specialisations of Graduate University Study in Geography; course: Research have enrolled in the Graduate University Study in Geography; course: Education.
4.6. List of courses and/or modules offered in a foreign language as well (name which language)	No courses are offered in a foreign language.
4.7. Completion of study:	
a. Final requirement for completion of study	Final thesis       Diploma thesis       X       Final exam       Diploma exam       X
b. Requirements for final/diploma thesis or final/diploma/exam	All exams passed and all other obligations foreseen by the programme and a Diploma Thesis certified by the mentor/supervisor.
c. Procedure of evaluation of final/diploma exam and evaluation and defence of final/diploma thesis	The procedure commences with submission of the Graduate/Diploma Thesis theme of the student's own choice (on the appropriate form from the Student Office of the Dept. of Geography) as agreed with the lecturer – supervisor. The student shall be obliged to submit the Diploma Thesis theme to the Asst. Head Lecturer prior to the last sitting of the Dept. of Geography Council (the VGO) at the latest, in the semester prior to the one in which he/she shall be defending his/her Diploma Thesis. In agreement with the supervisor and in keeping with the general guidelines of the Dept. of

University of

Zagreb

# **FORM 1** Evaluation of university study programmes of undergraduate, graduate and integrated undergraduate and graduate studies, and vocational studies

#### DETAILED PROPOSAL OF THE STUDY PROGRAMME

Geography, the candidate shall commence work on the Diploma Thesis in an optimal scope of 50 pages. The main objective of the Diploma Thesis in the Graduate University Study of Geography shall be the application of the research approach in collecting, processing and interpreting information, by which the level of attained specialist competence of the student shall be demonstrated. On condition that the student has passed all the prescribed examinations and fulfilled all other mandated study obligations, at the approval of the supervisor and subsequent to two revisional perusals at the most of the student's Diploma Thesis, a spiralled bound copy of the student's Diploma Thesis shall be deposited at the Student Office of the Dept. of Geography by 5 working days at the latest prior to the meeting of the VGO at which a three-member committee shall be elected to assess the defence of the Diploma Thesis. The Diploma Thesis Committee may request additional changes and approve the compilation of a final version of the thesis and set a date for its defence. The defence date shall be made public over at least one week. Prior to such defence, the student shall be obliged to deposit at least one final copy with the Student Office of the Dept. of Geography, and such version shall be in a hard copy and accompanied by a digital version, for the library archive. Defence of the thesis shall consist of a brief presentation of the paper, lasting no longer than 20 minutes, and oral responses to the question of the Committee's members, which shall relate to the paper, but could also encompass mandatory material from the overall study programme. The defence procedure shall last for 60 minutes at the most. The Committee shall separately assess the Diploma Thesis and the oral part of the examination and shall on that basis (but not necessarily by taking an arithmetic mean of those two grades) issue its final assessment of the Diploma Thesis. The supervisor shall enter the final grade in the student's Index/Graduation Book and in the ISVU [Information System of Higher Education].

**FORM 1** Evaluation of university study programmes of undergraduate, graduate and integrated undergraduate and graduate studies, and vocational studies

1. GENERAL INFORMATION						
1.1. Course teacher	Neven Hrvatić	1.6. Year of the study programme	1 <sup>st</sup>			
1.2. Name of the course	Methodology of Teaching Pupils with Special Needs	1.7. Credits (ECTS)	4			
1.3. Associate teachers	Iva Ivanković	1.8. Type of instruction (number of hours $L + S + E + e$ -learning)	30+30+0+0			
1.4. Study programme (undergraduate, graduate, integrated)	Graduate University Study in GEOGRAPHY, Course: EDUCATION	1.9. Expected enrolment in the course	15			
1.5. Status of the course	Required	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1; 5 %			
2. COUSE DESCRIPTION						
2.1. Course objectives	The aim of this course is to introduce students to contemporary theory of special education, inform students about effective ways of teaching children with various types of disabilities in regular educational institutions so that they can provide competent teaching, curriculum design and other educational activities for students with special needs.					
2.2. Course enrolment requirements and entry competences required for the course						
2.3. Learning outcomes at the level of the programme to which the course contributes	Gg_27 analyze theories of educational geographyGg_28 interpret the basic methodology of education researchGg_29 explain the theoretical foundations of pedagogy and didacticsGg_31 analyze the elements needed for the preparation, implementation, evaluation and administration of geographyteaching in primary and secondary schoolsGg_45 apply appropriate methodology in education researchGg_50 communicate effectively with all stakeholders in the education systemGg_51 apply classroom management skills					
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Expected learning outcomes relate to the training of students that through independent and critical study of literature and discussions in seminars and field study to master the basic knowledge in the field of special pedagogy, foundation, basic conceptual definitions and direct educational activities for geography. • The exercise of subject content should provide a comprehensive and systematic overview of methodological procedures with children of special needs in the teaching of geography, as well as their integration / inclusion, within the knowledge of some broader areas:					

	<ul> <li>Individual similarities and differences in the development of children and youth (intravariability and intervariability),</li> <li>Types of deviations in development and areas of disability,</li> </ul>
	- Basic characteristics of children with developmental disabilities, behavioral disorders and gifted children,
	- The position and rights of children with special needs in the system of education in Croatia,
	- Pedagogical and methodological procedures in meeting the special needs of children and youth with mental, visual,
	auditory,
	physical and combined developmental difficulties and changes in personality conditioned organic and social-emotional
	factors.
	• Summarize basic knowledge and realize comprehensive and systematic insight into Special education, its foundation and
	terminology.
	• Effective and efficient to construct the educational context as an enabling and development, tailored to all students, in
	relation to their abilities, opportunities, needs and interests, and on this basis pursue integrative educational practice.
	o own design, implement and evaluate an integrated curriculum in the context of differentiated approach to students with
	special needs.
	◦ The judgment may critically relationship to the actual achievements of special pedagogy and integrative educational
	practice in teaching geography.
	• Develop the ability to create pedagogically meaningful activities that contribute to the integration of students with special
	needs.
	1. Special Pedagogy Basics: Methodology of teaching children with special needs
	2. Individual similarities and differences in child development (intravariability, intervariability)
	3. Educational integration
	4 Structure of education of children with special needs
	5. Models of educational integration
	6. Teacher competences

2.13. Quality assurance methods that ensure the acquisition of exit competences	After completion of the semester students evaluate (anonimously): - course contents and coverage of literature, - mode of displaying and explaining the material to be adopted, - the time required for learning. Teacher submits a report on his course every academic year. The report contains: - analysis of attendance and student activity in the classroom, - review of course content and comparison with similar courses at other universities, - literature review - efficiency in course assignments (success of students on tests and exams) - possible changes in course content, method of construction and testing.

2. COUSE DESCRIPTION					
<ul> <li>to acquaint students with basic demographic indicators and processes, the state and trends in population development Croatian</li> <li>explain to students the modern demographic picture of Croatia and the conditions in which it was created</li> <li>to develop students' knowledge of the peculiarities of the development of the Croatian population outside the framework of the theory of demographic transition</li> <li>to acquaint students with the destructive effects of wars on the development and structure of the Croatian population</li> </ul>					

	explain the importance of the population in contemporary spatial relations and processes in Croatia
	• to acquaint students with the procedures of making demographic forecasts and projections
	<ul> <li>to acquaint students with strategies and models of population revitalization</li> <li>explain to students the role of geographical studies of the population in different forms of planning (regional, spatial,</li> </ul>
	social)
	<ul> <li>to train students for independent research work of the Croatian population</li> </ul>
	• to develop students' knowledge of the primary influence of the population in the Croatian spatial reality
2.2. Course enrolment requirements and entry competences required for the course	-
	Gg_34 improve the application of knowledge in identifying, determining and solving spatial problems of medium
	complexity
2.3. Learning outcomes at the level	Gg_35 argue the importance of knowledge and understanding of essential facts, concepts, principles and theories in geography
of the programme to which the course contributes	Gg_36 interpret geographically relevant and current phenomena and processes, with argumentative representation of
course contributes	the geographical approach in discussions
	Gg_37 transfer scientific to educational content in written preparations for teaching geography, with an appropriate
	presentation of educational content
	- apply demogeographic theoretical and methodological concept and system
	- analyze the functional organizations of the population in Croatia as a basis for spatial planning, including the correlations of natural - basis and population in Croatia, general and regional concept of the organization of Croatian
	space - evaluate the strategic importance of the population for Croatia, a functional and sustainable organization of the
	population
2.4. Learning outcomes expected at	- propose solutions and forecasts of spatial laws developed by the population
the level of the course (4 to 10 learning outcomes)	- explain relevant demographic spatial processes, connections, relationships and models, with special emphasis on demographic spatial disparity
	- consider written and oral demographic approaches and content
	- apply relevant computational, graphical and cartographic methods and projections in considering, explaining and
	transmitting demographic laws
	- independently search and select demographic literature and data sources
	- make a proposal for a research task
2.5. Course content broken down in	1. Demographic aspect of Croatia's development.
detail by weekly class schedule	2. Spatial distribution of the Croatian population and regional differences.
(syllabus)	3. Development and movement of the Croatian population.
	4. Census and general movement of the Croatian population.

	<ol> <li>5. Natural movement of the population of Croatia.</li> <li>6. Spatial mobility of the population.</li> <li>7. Biodynamic characteristics of the Croatian population.</li> <li>8. Economic and social structures of the Croatian population. Ethnic and religious composition.</li> <li>9. Contemporary demographic trends in Croatia. Natural decline, depopulation and population extinction.</li> <li>10. Demographic resources and potentials of the Republic of Croatia.</li> <li>11. Revitalization models of the Croatian population.</li> <li>12. Population as a basis for development and planning.</li> <li>13. Population policy measures.</li> <li>1415. Predictions (forecasts) and projections of the movement and composition of the population of Croatia.</li> </ol>					
2.6. Format of instruction:	☑ lectures       ☑ independent assignments       2.7         ☑ seminars and workshops       □ multimedia and the internet       Thi         □ exercises       □ laboratory       student				7. Comments: his course especially accents tudents discussions and evelopment of its cognitive abilities.

1. GENERAL INFORMATION						
1.1. Course teacher	Borna Fuerst-Bjeliš	1.6. Year of the study programme	1 <sup>st</sup>			
1.2. Name of the course	Mediterranean	1.7. Credits (ECTS)	3			
1.3. Associate teachers	Lana Slavuj Borčić	1.8. Type of instruction (number of hours $L + S + E + e$ -learning)	30+15+0+0			
1.4. Study programme (undergraduate, graduate, integrated)	Graduate University Study in GEOGRAPHY, Course: EDUCATION	1.9. Expected enrolment in the course	12			
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1; 5 %			
2. COUSE DESCRIPTION						
2.1. Course objectives	Acquiring fundamental knowledge of the concept, significance and space of the Mediterranean as a region /place. Discussing the identity elements. Understanding of the Mediterranean as a link of continents and cultures. Acquiring fundamental knowledge of the environment, processes of degradation and natural and environmental risks; elements of cultural heritage. Developing particular cognitive, practical and generic abilities and skills: applying knowledge in determining, defining and solving spatial problems of medium-level complexity, skills needed for evaluation, interpretation and synthesis of relevant information, skills needed for presenting scientific contents and stances in written and oral form.					
2.2. Course enrolment requirements and entry competences required for the course	-					
2.3. Learning outcomes at the level of the programme to which the course contributes	Gg_33 to shape the contents of the regional geography of Europe and the world for application in the teaching of geography Gg_36 interpret geographically relevant and current phenomena and processes, with argumentative representation of the geographical approach in discussions Gg_37 transfer scientific to educational content in written preparations for teaching geography, with an appropriate presentation of educational content Gg_46 evaluate the knowledge gained by searching the literature and sources					
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Understanding of the uniqueness of the Mediterranean as a consequence of linking the different cultures in the unifying conditions of environment and life rhythms'. Knowing and understanding the uniqueness of the environment. Knowing and understanding the causal relations of dominant degradation processes and formation of cultural landscapes as the outcomes of millennial man-environment interactions in Mediterranean. Recognition of the cultural landscape (and heritage) elements and its significance for the economy and development (tourism).					

2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ol> <li>Concept of the Mediterranean. Significance and identity.</li> <li>Unity and fragmentation.</li> <li>Inner divisions and conceptualization. Regional divisions. Eumediterranean unity.</li> <li>European and African-Asian links</li> <li>Adriatic in the Mediterranean.</li> <li>Geopolitical themes of the Mediterranean</li> <li>Geological evolution of the Mediterranean.</li> <li>Earthquakes, volcanism</li> <li>Mediterranean climate</li> <li>Mediterranean vegetation</li> <li>Mediterranean vegetation of Croatia</li> <li>Degradation, desertification and risks</li> <li>Mediterranean and Adriatic seas</li> <li>Adriatic hydrological system. Islands</li> </ol>

1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1; 5 %		
2. COUSE DESCRIPTION					
2.1. Course objectives	Adoption of the general knowledge of the urban systems of the world, their differences and development. Students have to know the methods for the analysis and the characteristics of the world's urban systems, the development phases and regional specifics of the urban systems as well as the cultural-genetic characteristics of the cities, the development of the urban systems under influence of the European integration and the global urban system. They have to be able to apply the theoretic models and use the statistic and cartographic methods for analyzing spatial, hierarchical and temporal specifics of the urban systems of the world.				
2.2. Course enrolment requirements and entry competences required for the course	-				
2.3. Learning outcomes at the level of the programme to which the course contributes	Gg_35 argue the importance of knowledge and understanding of essential facts, concepts, principles and theories in geography Gg_36 interpret geographically relevant and current phenomena and processes, with argumentative representation of the geographical approach in discussions Gg_37 transfer scientific to educational content in written preparations for teaching geography, with an appropriate presentation of educational content Gg_39 apply the skills needed to evaluate, interpret and synthesize information and data				
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<ul> <li>-to define the notion and explain the characteristics of the urban systems of the world</li> <li>-to apply the methods for the analysis of the urban systems</li> <li>-to identify the phases of the urban systems development on the local, national and global levels</li> <li>-to explain and compare regional specifics of the development of the urban systems and the cultural-genetic characteristics of the cities</li> <li>-to transfer scientific information about urban systems into education process</li> </ul>
